Kennesaw State UNIVERSITY
Wellstar College of Health and Human Services
Department of Social Work and Human Services

MSW Field Education Manual

2018-2019

Department of Social Work and Human Services 520 Parliament Garden Way, MD 4103 Kennesaw, Georgia 30144
Department located on the 3rd Floor of Prillaman Hall
Dear Student,

Welcome to Wellstar College of Health and Human Services (WCHHS) Department of Social Work and Human Services at Kennesaw State University. The social work faculty, administration, and staff, trust you will have a successful and rewarding educational experience as you prepare for professional social work practice. This Manual contains all the information necessary for understanding and successfully navigating the field education program at KSU.

It is expected that all students meet not only academic performance standards and abide by the University’s Code of Conduct and professional standards of behavior as well. The National Association of Social Workers’ Code of Ethics explicates those standards. Students are expected to observe the provisions of the Code of Ethics in the classroom, field setting, and the community. The Manual is regarded as supplementary to Kennesaw State’s Graduate Catalog and to the current curriculum materials concerning the Master of Social Work (MSW) Program.

This Field Education Manual provides policies and procedures pertaining to student field internships. It will answer many of the questions students may have about the MSW field internship experience. Students should understand the policies and procedures in the manual to successfully complete field internship requirements. The manual is intended to:

1) Enhance the quality of learning which occurs during field placement
2) Support the effective use of Field Education as part of the Department of Social Work and Human Services MSW curriculum, and
3) Establish standards consonant with Council on Social Work Education policy and KSU graduate education.

The guidelines suggested should not supplant professional judgments nor become constraints to the creative use of experience in directing field learning.

It is the student’s responsibility to become familiar with the manual and refer to it when there are questions. We hope that you find this manual a useful guide as you pursue your professional studies at KSU. The administration and faculty are grateful to all who participate in the field internship component of the curriculum, enabling and enhancing the integration of theory, social work practice and professional development.

Sincerely,

Naynette Kennett, LCSW

INTRODUCTION

Overview of Master of Social Work Program

The Master of Social Work (MSW) program at Kennesaw State University (KSU) is an academic unit in the Department of Social Work and Human Services (SWHS) in the College of Health and Human Services (CHHS). The MSW Field Education Program is organized around the belief that structured supervised graduate level internships are a critical generalist for the education and training of competent clinical social workers. The program offers concurrent field practicum experiences for students such that first year generalist level students are in field practicum two days per week and second year Specialization level students are in field practicum three days per week. Field agencies for students are selected based on their ability to provide experiences that integrate students’ theoretical knowledge with the constantly evolving practice of the profession and for their capacity to prepare and train future social workers for clinical practice in a range of settings.

Field practicums serve as arenas in which students test and apply theory, knowledge, values, skills, cognitive and affective processes gained in the four academic areas: Human Behavior and the Social Environment, Social Welfare Policy and Services, Social Work Practice, and Research. Students test their commitment to the social work profession and work to consolidate an identity as a professional social worker. Throughout these learning experiences students are expected to gain a working knowledge of and to comply with the NASW code of ethics.

Students enrolled full-time complete the MSW program in two years.

The MSW program is a clinical program. Clinical social work is defined by the National Association of Social Workers (NASW) as:

Clinical social work shares with all social work practice the goal of enhancement and maintenance of psychosocial functioning of individuals, families, and small groups. Clinical social work practice is the professional application of social work theory and methods to the treatment and prevention of psychosocial dysfunction, disability, or impairment, including emotional and mental disorders. It is based on knowledge of one or more theories of human development within a psychosocial context.

Accreditation

The Council on Social Work Education (CSWE) establishes guidelines and policies for all accredited bachelor and master social work programs. The KSU MSW program has been accredited by CSWE since 2005.

MSW Program Mission Statement

The mission of the MSW program at KSU is to educate graduates to improve the quality of life for individuals, groups, and families in Northwest Georgia and Metropolitan Atlanta. (Revised, approved and adopted February 7, 2011). The program’s mission is consistent with the university’s commitment to “outstanding programs of distinctive characteristics that have a magnet effect throughout the region or state.” (www.kennesaw.edu/mission.shtml) The program is in the WellStar College of Health and Human Services, where it provides “quality graduates for employment in the broad-based fields of health and human services.” The MSW program also supports the profession’s historic commitment to serve diverse, oppressed and at-risk members of society, by equipping graduates for leadership and direct services.
The MSW program is a clinical program. The program builds upon a liberal arts perspective and provides students with an ability to apply a range of evolving theories that consider the larger social systems in which they are embedded. The program promotes critical thinking, self-reflection, and professional values and ethics that assist students in appreciating a bio-psychosocial-spiritual framework for understanding client systems. The MSW program also supports the profession’s historic commitment to serve diverse, oppressed and at-risk members of society.

**MSW PROGRAM GOALS**

**Goal 1:** Students will demonstrate a well-defined clinical social work identity and the ability to practice Specialization clinical social work with individuals, families, and groups. The clinical MSW program provides students with a distinctive body of knowledge and skills to assess, treat, and engage in prevention activities and services addressing problems and social conditions that interfere with the healthy bio-psychosocial-spiritual functioning of individuals, families and groups. The program emphasizes providing services to vulnerable populations. The vertically and horizontally integrated program curriculum also supports students’ development of sound clinical social work identities.

**Goal 2:** Students will demonstrate the principles, values and ethics of the social work profession. Throughout the curriculum, students are taught to address professional values and ethics. In generalist courses, students review the core values of the profession as defined by the NASW Code of Ethics. Students move from the abstract definition of ethics and values to their application to clinical practice.

**Goal 3:** Students will demonstrate knowledge of bio-psychosocial-spiritual, cultural, economic and social dimensions of development and human behavior to inform practice. The program integrates a bio-psychosocial-spiritual perspective into the curriculum. Students are taught to take into account the influence of cultural, economic and social dimensions on human development and behavior. Integral to this process is conducting assessments and interventions that consider cultural, economic and bio-psychosocial-spiritual factors that inform practice.

**Goal 4:** Students will demonstrate the skills and attitudes necessary for critical thinking and reflective practice. Over the course of the program, students become increasingly able to use critical thinking skills to identify the strengths and limitations of various theories for diverse populations. Students learn to intervene appropriately with clients, based upon this analysis. Students also adapt their clinical knowledge base to the client’s lived experiences.

**Goal 5:** Students will demonstrate and apply dimensions of diversity and its value in advancing human rights, and social and economic justice. The MSW program supports the social work profession’s historical commitment to serve diverse, oppressed and at-risk members of society to advance human rights and economic justice. In both the generalist and Specialization level courses, special attention is paid to individuals, families and groups who have been historically marginalized and disadvantaged.

**Goal 6:** Students will demonstrate the ability to recognize various factors and contexts that influence policies and practice that will allow one to advocate on behalf of vulnerable, oppressed and diverse populations. MSW graduates will work in a range of agency settings in suburban, urban and rural environments located in Metropolitan Atlanta and Northwest Georgia. Students learn that they must consider various factors and contexts in their work and community environments that influence policies and practices impacting their clients. They also learn that they have the professional
obligation to modify and/or change policies and practices that negatively impact the client systems with which they work.

Goal 7: Students will demonstrate the use of evidence-based research in one’s engagement, assessment, interventions, and evaluation to inform one’s practice. Both research methods and practice evaluation courses are taught in the MSW curriculum. These courses help students integrate clinical knowledge and skills with evidence-based interventions, approaches, and strategies. The program’s curriculum emphasizes the importance of a clinical social worker’s ability to synthesize findings to empirically evaluate practice.

**MSW FIELD EDUCATION PROGRAM IN THE MSW CURRICULUM**

**What is Field Education?**

Field Education is the “signature pedagogy” of social work education. It gives students the opportunities to learn by doing, by integrating curriculum into field practice under the supervision of a field supervisor and field faculty instructor. Social work education includes both classroom and field internships, it is a part of social work curriculums. At KSU, the MSW program requires students to complete field internships concurrently with course work during. All students must be enrolled in field seminar to complete an MSW field internship. The goal of field internship is to strengthen the students’ learning in both the classroom and field internship.

Field education constitutes 12 credits of the 60 credits required to earn an MSW in the program. The Social Work Program requires 480 clock hours at an organization for generalist field practicum (3 credits each of two semesters) and 720 clock hours at an agency for Specialization field practicum (3 credits each of two semesters).

The generalist field placement is a generalist social work practice experience that allow students to learn generalist social work practice. This means that each student will focus on practicing basic skills and understanding how human service programs are developed, implemented, and evaluated. All students should have the opportunity to interact directly with the agency’s clients, most often assessing needs and resources, and providing and identifying resources and improving service delivery to clients. Students may also assist in program activities, such as collecting information about the community, budgeting, grant writing, fund raising, and attending interagency community meetings.

The specialization field placement is compatible with the student’s choice of their concentration of study. Students participate in “Micro” (clinical) practice at an agency with a variety of different populations for their concentration.

Second year student placements are at agencies that correspond with their area of interests and allow students to learn Specialization clinical social work practice skills. Students experience multiple clinical roles through their internships and learn to work within the many environments in which clients live so that they can facilitate therapy, social networking, mediation, brokering, and advocacy.

Field internship sites are located throughout Metropolitan Atlanta and surrounding areas.

**Integration of Class and Field Internship**

The integration of class and field learning is achieved through multiple methods involving faculty, field supervisors, and students. The MSW field faculty prepare course syllabi, infusing opportunities throughout their courses for students to apply theoretical concepts to field activities through assignments. Through classroom dialogue and case presentations, students share field experiences,
projects, cases, and learning from their agencies.

Field Seminar Courses
Field Seminar allow students in diverse field placements an opportunity to share information and personal observations with one another, and to support each other’s effort to integrate course learning with practice experience. It is a time for additional educational learning and reflection. Field Seminars serve as an integral part of the field placement experience, providing students with further guidance and assistance in the integration of theory and practice.

Field Seminar courses are facilitated by MSW field faculty instructors and are required as part of the field experience for the generalist and specialization year internships. The field seminar topics are established by the field education program. However, changes can be made at the discretion of the field seminar instructor based on the student needs within the seminar grouping.

**GENERALIST YEAR – Field Internship & Integrative Seminar**

<table>
<thead>
<tr>

<td>Students attend Bi-weekly 2 hours field seminar during fall and spring semesters; Minimum 7 class meetings each semester</td>
<td>Student complete 16 hours of field internship each week (Mon &amp; Tues)</td>
<td>This seminar provides a service-based educational experience with specific objectives in an agency setting, which requires students to complete 280 required hours of field internship for Semester I of Year I.</td>
</tr>
<tr>
<td>SW 7709 – Internship II</td>
<td>3</td>
<td>Students attend Bi-weekly 2 hours field seminar during fall and spring semesters; Minimum 7 class meetings each semester</td>
<td>Student complete 16 hours of field internship each week (Mon &amp; Tues)</td>
<td>This seminar builds upon SW7708. Generalist Internship/Integrative Seminar I. Students continue a service-based education experience with specific objectives in an agency setting, which requires students to complete 280 required hours of field internship for Semester II of Year I.</td>
</tr>
</tbody>
</table>

The generalist year Field Internship/Integrative Seminar provides an arena for students to discuss cases and any other issues they may be experiencing, to learn from each other, and to receive constructive feedback from their field faculty instructor. Field seminar is an integrative seminar that is required for all students completing an internship. It is designed to help students integrate their coursework learning with their experiential learning in the field internship, the integrative seminar is taught by field faculty who remains in communication with the students' agency supervisors on issues pertaining to the students' field experience. Through class discussions, process recordings, and agency presentations, students learn about professional social work practice with an emphasis on critical thinking, self-awareness, ethics and values, and culturally responsive practice with an emphasis on human rights and social justice.
During the generalist field placement, students are in field for approximately 240 clock hours per semester for two semesters. Students complete 2 full days a week, for a total of 16 hours per week. Students must have a minimum of one hour of agency supervision per week by a MSW with 2 years post-MSW experience. Students in the generalist field placement focus on development of generalist knowledge, skills, values, and cognitive and affective processes that provide the groundwork for the Specialization Year.

Students begin internship the second week of classes in the fall semester and continue through the spring semester. Students may not start their internship hours prior to the start of classes. There are two exceptions, orientation and training. However, students that complete orientation and/or training prior to the start of classes may count no more than 16 hours towards the field hour requirements in the fall semester.

Assignments will vary depending on (a) agency and community resources, and opportunities; and (b) student interests and career goals. Typically, students engage in direct services with individuals, families, or small groups. Working with these client systems, the student develops the ability to assess, design, and implement social interventions and to evaluate outcomes.

In addition, each generalist field student is assigned an organization/community project or activity to develop skills in macro service assessment, intervention, and evaluation. In developing skills to promote the improved functioning of organizations and communities, students have hands-on responsibilities just as they do in working with direct services clients. Passive observations of organizational or community functioning are not considered adequate to meet this learning goal. In general, generalist internship learning activities should include micro, mezzo, and macro activities.

---

**SPECIALIZATION YEAR - Field Internship & Integrative Seminar**

</thead>
<tbody>
<tr>
<td>SW 8712 Specialization Internship III</td>
<td>3</td>
<td>Students participate in monthly virtual, face-to-face, and/or trainings for the field seminar course during fall and spring semesters; Minimum 4 class meetings each semester</td>
<td>Student complete 24 hours of field internship each week (Wed-Fri).</td>
<td>This specialization integrative seminar provides a service based second year educational experience that builds upon the first-year field internship/integrative seminars and internships. Students develop specialization clinical skills in Children and Family Services, Mental Health Services and the sub-specialty, Substance Abuse. Students in Specialization Field Internship III will complete 360 hours of supervised internship by dedicating 3 full days per week in their field internship.</td>
</tr>
<tr>
<td>SW 8713 Specialization Internship IV</td>
<td>3</td>
<td>Students participate in monthly virtual, face-to-face, and/or trainings for the field seminar course during fall and spring semesters; Minimum 4 class meetings each semester</td>
<td>Student complete 24 hours of field internship each week (Wed-Fri).</td>
<td>This Specialization integrative seminar continues the services based second year educational experiences that builds upon the first year and first Specialization internship experiences. Students continue to refine their clinical skills by completing the final 360 hours of field work (a total of 720 field hours for the 2nd year) supplemented by an integrative seminar.</td>
</tr>
</tbody>
</table>
In field, Specialization students are expected to apply a variety of practice methods appropriate to the client system, the setting, and the presenting need of the client system. Students have the opportunity to work with different types of client systems, including individuals, families, and groups. Students work with clients from a variety of backgrounds representing various dimensions of diversity, including age, race/ethnicity, gender (including identity and expression), sexual orientation, and socioeconomic status. Students actively evaluate direct practice outcomes and their own practice. Students learning opportunities should primarily focus on direct practice with clients. Students learning activities should also include areas in Community, Management, and Policy Practice (macro practice).

Specialization students build on the knowledge and experience gained in their generalist year. The Specialization year field internship requires three full days in an agency setting where the student must complete 720 hours of supervised field experience (360 clock hours per semester). Students must have a minimum of one hour of agency supervision per week. All Specialization year students must be supervised by an LCSW. However, they can receive daily/task supervision by a licensed clinician from another discipline. Specialization year field internship allows the student to engage in direct Specialization clinical practice.

The Specialization field internship requires that students experience in-depth interviewing techniques; practice the application of multi-dimensional bio-psychosocial-spiritual assessment tools; synthesize and differentially apply theories of human behavior and the social environment to guide clinical practice; employ Specialization ethical decision making skills; apply knowledge of diverse populations to enhance clients’ growth; assess clients’ readiness for change; modify treatment goals and interventions as appropriate; and use research methodology to evaluate clinical practice.

Students begin internship the second week of classes in the fall semester and continue through the spring semester. Students may not start their internship hours prior to the start of classes. There are two exceptions, orientation and training. However, students that complete orientation and/or training prior to the start of classes may only count up to 16 hours towards the field hour requirements in the fall semester.

Assignments vary depending on, level of student skill, placement opportunities, and community resources. Example of assignments are clinical interviews, clinical case treatment plans, biopsychosocial assessment, macro change agent project, and professional presentations presented to students and/or faculty within the department at the end of each semester. All placements are designed to enable students to work with disadvantaged, vulnerable, and oppressed populations.

**MSW Core Competencies and Practice Behaviors**

The field education experience is how each student connects theoretical and conceptual knowledge learned in the classroom to the practice of social work through placement in a community-based agency. Core Competencies, Practice Behaviors and Specialization Practice Behaviors are utilized throughout the curriculum and field education as the threshold for professional competence.

In 2015, the Council on Social Work Education CSWE approved revisions of the Educational Policy and Accreditation Standards (EPAS) Core Competencies and Practice Behaviors for accredited social work programs. There are 9 Core Competencies and 32 Practice Behaviors established by CSWE and have been adopted by the MSW Program for generalist year. In the specialization year there are 9 Core
Competencies and 33 Practice Behaviors established by CSWE and the MSW Program. The MSW Program Core Competencies for Generalist and Specialization Year are listed below.

### Generalist Year

<table>
<thead>
<tr>
<th>Educational Policy &amp; Core Competencies</th>
<th>Practice Behaviors</th>
</tr>
</thead>
</table>
| **Core Competency 1**  
*Demonstrate ethical and professional behavior* | 1) Make ethical decisions by applying standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context.  
2) Use self-reflection and self-regulation to manage personal values and maintain professionalism in practice situations.  
3) Demonstrate professional demeanor in behavior, appearance, and oral, written, and electronic communication.  
4) Use technology ethically and appropriately to facilitate practice outcomes.  
5) Use supervision and consultation to guide professional judgment and behavior. |
| **Core Competency 2**  
*Engage diversity and difference in practice* | 7) Apply and communicate understanding of the importance of diversity and difference shaping life experiences in practice at the micro, mezzo, and macro levels.  
8) Present themselves as learners and engage client and constituencies as experts of their own experiences.  
9) Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse client and constituencies. |
| **Core Competency 3**  
*Advance human rights and social, economic, and environmental justice* | 10) Apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and systems levels.  
11) Engage in practices that advance social, economic, and environmental justice. |
| **Core Competency 4**  
*Engage in practice-informed research and research-informed practice* | 12) Use practice experience and theory to inform scientific research.  
13) Apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings.  
14) Use and translate research evidence to inform and improve practice, policy, and service delivery. |
| **Core Competency 5**  
*Engage in policy practice* | 15) Identify social policy and the local, state, and federal level that impacts well-being, service delivery, and access to social services.  
16) Assess how social welfare and economic policies impact the delivery of and access to social services.  
17) Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice. |
### Core Competency 6
**Engage with individuals, families, groups, organizations, and communities.**

- **18)** Apply knowledge of human behavior and the social environment, person-in-environment, and other multi-disciplinary theoretical frameworks to engage with clients and constituencies.
- **19)** Use empathy, reflection, and interpersonal skills to engage diverse clients and constituencies.

### Core Competency 7
**Assess individuals, families, groups, organizations, and communities**

- **20)** Collect and organize data and apply critical thinking to interpret information from clients and constituencies.
- **21)** Apply knowledge of human behavior and the social environment, person-in-environment, and other multi-disciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies.
- **22)** Develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges with clients and constituencies.
- **23)** Select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

### Core Competency 8
**Intervene with individuals, families, groups, organizations, and communities.**

- **24)** Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies.
- **25)** Apply knowledge of human behavior and the social environment, person-in-environment, and other multi-disciplinary frameworks in interventions with clients and constituencies.
- **26)** Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes.
- **27)** Negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies.
- **28)** Facilitate effective transitions and endings that advance mutually agreed-on goals.

### Core Competency 9
**Evaluate practice with individuals, families, groups, organizations, and communities.**

- **29)** Select and use appropriate methods of evaluation of outcomes.
- **30)** Apply knowledge of human behavior and the social environment, person-in-environment, and other multi-disciplinary theoretical frameworks in the evaluation of outcomes.
- **31)** Critically analyze, monitor, and evaluate intervention and program processes and outcomes.
- **32)** Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

PREPARING FOR FIELD

Expectations of Field Education

The field education experience is an exciting time for students as you prepare to apply classroom knowledge to the actual practice of social work. Students have high expectations for their field placement and are enthusiastic about learning practice skills in the practicum setting. Students have invested considerable money and time into obtaining your MSW degree and want this to be a positive and challenging experience.

In addition to feeling excited about your field placement, as a student you may also feel nervous and anxious. These feelings are normal and common to all students beginning their field placements. These feelings can be discussed during field seminar and with your agency field supervisor during supervision. As your internship progresses, you will gradually build a sense of confidence in your ability to practice social work. Your anxiety will decrease as you interact with clients and practice social work as an active learner.

Many students are balancing school, internship and work. Please be mindful to practice self-care during this time. There are limited internships that provide some evening and weekend hours. Please note that the MSW program is under no obligation to provide evening (after 5pm) and weekend placements for students. These opportunities are very limited and sometimes not available at all. Students must be available to complete the majority of field hours during normal business hours.

The MSW program cannot guarantee flexible schedules, internships in specific geographic areas or client populations. Flexibility in terms of distance you are willing to drive does help with meeting your goals under these circumstances. These issues will be discussed during the field placement process with the Director of Field Education.

Field Placement Process

The field education placement process is a collaborative endeavor between the MSW Program, the student and community agencies. Under no circumstances can students plan for their own placements. Students are not allowed to contact any agency without coordination and referral from the MSW Field Education Director.

Students will be placed in appropriate and approved agencies by the Field Education Director after careful consideration of the student's educational needs, expressed interests, experience and career objectives. Therefore, to prevent confusion and misunderstandings, students are instructed not to contact field agency representatives without first discussing the situation with the Field Education Director. During the placement process, field agency representatives are contacted by the Field Education Director to determine the potential for student placement and to review specific learning opportunities required to meet program objectives.

Students are also restricted from field experiences in any agency where a dual relationship exists in a supervisory or authoritative position (i.e. agencies where a relative, friend etc. is in a position of authority) or where there is a potential for unclear boundaries. Students may not complete a field experience in an agency where they have been a client or where they may have access to family member’s files.
For both generalist and specialization internships, all students must complete the MSW Field Education application and interview with the Field Education Director prior to being placed at an agency for field internship.

The Field Education Department strives to provide quality field education opportunities for students with agencies that contract with the Kennesaw State University. All approved agencies must have a properly executed MOU Agreement with the University prior to any student beginning a field experience with that agency. The agency field supervisor approved to provide agency field supervision must also meet the qualifications as outlined in this manual.

Communication between the student, field faculty instructor, and the Field Education Director is a critical factor in the successful completion of the field placement process.

Field Education Organizational Structure, Roles and Responsibilities

The Office of Field Education is responsible for the overall administration of the field education program. The Field Education Director works under the supervision of the Director of the MSW program in collaboration with the Department Chair.

Role of the Field Education Director

The Director of Field Education, oversees the day-to-day operations of Field Education for the MSW program. The Director ensures that internship agencies provide learning opportunities that correspond with students’ educational needs. Each student’s learning is monitored by faculty members who serve as field faculty instructors. The field faculty instructors are liaisons between the social work program, the practicum agency and the student. Students’ field learning is carefully planned and promoted by an individual supervisor from within the agency setting.

Additional responsibilities of the Field Education Director:

- Maintains a list of approved partnering agencies capable of providing MSW students with high quality learning experiences;
- Identifies openings for students at approved agency sites;
- Coordinates student placements with agency openings;
- Coordinates student agency interviews and conducts follow-up confirmation of placements;
- Provides agency and student information to faculty field mentors;
- Trains and orients agency supervisor s prior to placing interns;
- Orients students to internship process;
- Provides and distributes field placement materials (i.e. applications, learning contracts, syllabi, evaluation forms, etc.);
- Provides consultation regarding all issues impacting the program-agency relationship and quality of students’ learning experiences;
- Recruits new agencies and conducts agency evaluations for potential sites;
- Maintains file of professional student liability insurance policies and ensures insurance is current;
- Ensures that approved and established field standards, processes and protocols are accepted by all faculty involved in carrying out field responsibilities;
- Ensures that faculty and staff involved in the delivery services to students through the Office of Field Education receive the training, supervision, and support needed to carry out their responsibilities;
• Serves as a resource to Office of Field Education constituents including the dean, faculty, students, partnering agencies and community;
• Ensures that the Office of Field Education maintains at all times a sufficient number of trained and experienced faculty field mentors skilled in providing internship students with positive learning experiences;
• Develops long-range plans for the Office of Field Education; and
• Evaluates feedback from students, faculty field mentors and agency supervisors regarding field experiences and utilizes this information as a basis for recommending new program initiatives.

Role of Field Faculty Instructor

The field faculty instructor is a faculty member within the Department of Social Work and Human Services that has two main functions: (1) liaison between a specific field placement agency, the SWHS Department, and the student; and (2) facilitator of the field seminar.

The field faculty instructor evaluates the quality of supervision students receive at their internship placement and also engages in problem-solving when there are difficulties. In addition, the instructor provides support to agency supervisors in their work with students and informs the Director of Field Education of any changes in agency policies. The faculty field mentor also keeps the Director of Field Education apprised of any problems within a student’s field placement.

During the field placement, the faculty field instructor is the contact person when field performance difficulties arise. If indicated and as appropriate, the Director of Field Education may be contacted and advised of specific field problems. If difficulties are considered serious, the field faculty instructor, in collaboration with the agency supervisor, the Field Education Director, and the student, will devise a plan of action that the student must complete by a designated time. This process is monitored closely by the field faculty instructor and the Field Education Director. If the issue is not resolved, it will be referred to the MSW Program Director for resolution. If no resolution, the issue will be referred to the Field Work Professional Performance Committee.

The second function of the field faculty instructor is to teach generalist and specialization field seminar courses. The field seminars allow students to discuss the application of theory to practice and a range of issues experienced during the field placement. The faculty field instructor serves as a consultant to the supervisor regarding students’ learning styles and any issues that may occur between the supervisor and the student. Additionally, the field faculty instructor makes one contact each semester, one of which has to be a site visit or phone call to the agency supervisor to discuss the student’s learning, areas of strength, and areas requiring improvement.

The field faculty instructor provides the student’s final grade based on the agency supervisor’s written evaluations, discussions with the student and supervisor during field visits, the extent to which the student has met his/her written goals that were approved by the supervisor, completion of field internship hours, completion of the various reports and forms required of the student by the Field Education Department, and the student’s in class participation and grade for the Field Integrative Seminar (SW 7708 and SW 7709 for Generalist Year and SW 8712 and SW 8713 for the Specialization Year). The field faculty instructor is ultimately responsible for evaluating each student’s field performance and for posting the student’s final grade. Additional field faculty instructor’s responsibilities are listed below:

• Participate in an orientation training session conducted by the Office of Field Education each year and other field faculty mentor meetings as needed;
• Facilitate the development of students’ integration of academic knowledge with
field experiences;
• Facilitate field integrative seminars;
• Meet with assigned students and their agency field supervisor s for a minimum of one (1) face to face contact per semester and one (1) telephone or e-mail contact per semester;
• Assess students’ progress at the end of each semester based on evaluations from the agency supervisor, students’ self-evaluations, and student’s performances in the Field Integrative Seminar;
• Report student internship concerns to the Field Education Director;
• Respond to requests and participate in decision-making processes regarding student internship placement withdrawals in collaboration with the Field Education Director;
• Serve as students’ advocate in the field internship;
• Serve as consultant to the Office of Field Education concerning students’ progress and learning during the internship; and
• Submit final student evaluation forms to the Field Education Director at the end of each semester.

Role of Agency Field Supervisor

Based on the standards established by the Council on Social Work Education for field study, the agency staff member designated as Field Supervisor will have a MSW degree, demonstrated competence in practice, experience or training in supervision, and a capacity for teaching social work. Field Supervisors must have two years of practice experience post-MSW. However, KSU MSW Program requires all specialization year field supervisors have an LCSW.

Every field student is assigned a MSW Field Supervisor who has the responsibility for providing educational guidance to the student in meeting the learning objectives and other requirements for study. It is expected that the Field Supervisor will have an ability to organize and transmit understanding of social work practice beyond knowledge of the specific placement setting. The Field Supervisor should be willing to include or draw upon other qualified professional staff members for access to their knowledge and skills in specific areas of practice. In addition, based on the opinion of the agency and University, the Field Supervisor should have an ability to relate warmly and effectively to the student, to stimulate and support the student in the learning process, and to assist the student to incorporate the values and ethics of the social work profession. In performing this role, the Field Supervisor:

• Provides student with a general orientation to the field agency.
• Identifies and/or designs learning assignments for the student.
• Reviews, modifies (as needed), and signs the student's learning contract.
• Provides ongoing supervision to the student concerning field assignments.
• Schedules weekly supervisory conferences (minimum of 1 hour) with the student to assist them in relating assignments and theory to social work practice and to discuss other issues associated with the profession of social work.
• Provides ongoing feedback to the student concerning their performance in the field.
• Maintains contact with and meets with the Field Faculty Instructor to monitor student progress.
• Attends field workshops and meetings scheduled on campus before and during the placement semester.
• Completes mid-semester (fall semester only), and final semester evaluations of the student's performance).
• Review and sign the MSW Field Education timesheet on a WEEKLY basis as required by
Role of the Task Supervisor

The Task Supervisor is an agency staff member who may be assigned to supervise specific learning assignments given to the field student in the absence of or in conjunction with the agency field supervisor. The Task Supervisor (when assigned) should sign the timesheet and participate in the evaluation of the student with the Field Supervisor and student.

Role of Student Interns

All students admitted to the MSW program have three general responsibilities: (1) to attain knowledge and skills in the social work profession, (2) to participate fully in the learning process, and (3) to act in accordance with the ethics, values and norms of the social work profession. To meet these responsibilities, students will also adhere to the following requirements:

1. Students will remain in the same field agency throughout the course of their internship.
2. Students will not complete an internship in the same field agency for the generalist and Specialization internships, except for special circumstances approved by the Field Education Director on an individual basis.
3. Students may not start their agency field education experience prior to the start of the semester except for mandated orientation with the field agency. A maximum of 16 hours of field hour credit will be given for orientation and/or training completed prior to the start of the semester. This does not include completion of requirements to be accepted as an intern such as background screening and immunizations.
4. Students may not continue their placement beyond the last date of the semester (including finals week) without prior approval of the agency field supervisor and field seminar instructor and Field Education Director.
5. Students generally follow the holiday schedule of the University. However, there are some exceptions. For example, if the agency is open on a day that is a holiday for the University, the student is expected to continue to work in the agency on that day. Therefore, students are expected to discuss holiday work schedules with the agency field supervisor to clarify expectations and this should be done in the beginning of the internship experience.
6. Lunch and dinner hours are not part of internship field hours unless students are required to remain with clients during mealtime.
7. Students should not plan vacation or other leave during their internship except during the time between semesters. Agencies may require students to work during spring break or during the semester break. Students cannot earn any hours of field education during the semester break (time off between fall and spring semesters) to carry forward.
8. Time missed for approved reasons must be made-up during the semester in which it was missed. Time missed for unapproved reasons may result in a failing grade for field seminar.
9. Professionalism is expected of students always including behaving in a professional manner, keeping commitments to the agency, agency field supervisor and clients. If students are unable to be on time or present when expected, it is critical to communicate your absence to your agency field supervisor immediately.
10. Students are expected to take initiative in seeking advice, consultation or help from your agency field supervisor, field seminar instructor or the Field Education Director.
11. Students may attend seminars and workshops offered by your agency or community agency if they pertain to your field education experience and if you have the prior approval and permission of your agency field supervisor. A maximum of 8 hours per semester is approved for attending seminars and workshops outside of the regular practice of the field placement.
12. Students are expected to follow the policies and procedures of the field agency and field
supervisor. Please contact field seminar instructor or field education office if you have
corresponds about expectations for you as a student.

13. Site visits will be conducted at least once during your field placement. The field seminar
instructor will visit you in your agency to discuss the progress you are making, goals for the
remainder of the internship and the application of theory to practice. Students are present
during the site visit along with the agency field supervisor. Students are encouraged to let the
field seminar know if they wish to meet privately with the field faculty instructor during the
site visit.

14. Mid-semester and final semester evaluations are completed by the agency field supervisor for
all students and discussed with the student. Students are strongly encouraged to keep a copy of
the evaluations for their records.

15. Grading for the field seminar for graduate students is on a letter grade basis. Students are
expected to earn a “B” or above and ratings of “3” or above on all learning
competencies/practice behaviors/ Specialization practice behaviors to successfully pass field
education. Ratings of “2” and below will result in a corrective action plan and may result in a
failing grade for field education.

16. The MSW Program and the field agency will enter an MOU Agreement which outlines the
conditions of the field placement.

17. Students are covered for professional liability insurance by Kennesaw State University while
enrolled in field seminar courses (SW 7708; SW 7709; SW 8712 & SW 8713).

18. Students are not allowed to transport clients in their personal vehicle under any circumstances.
Students also may not drive agency vehicles.

19. Develop with the agency supervisor measurable learning tasks/activities, using the appropriate
curriculum for the internship being completed.

20. Complete the learning contract for the academic year at the start of the fall semester, review the
learning contract in at the start of the spring semester, and make additions/changes as appropriate
with advisement from the agency supervisor and field faculty instructor.

21. Participate in activities assigned by the agency supervisor and offer services to client systems
with increasing knowledge and autonomy and within the policies and practices of the agency
setting.

22. Students are expected to complete most hours during normal business hours.

23. Students are expected to attend the field education orientation the first week of classes and
cannot begin internship until it is completed.

24. Student will sign an Internship Placement Agreement during MSW Program Orientation.
Student cannot begin internship without a signed Internship Placement Agreement in their field
education file.

It is expected that students will meet the required competencies and practice behaviors for the generalist
and specialization year course work and field internships; follow the policies and procedures of the
respective agency in which they are placed for their internship; and adhere to the standards for
professional performance and conduct as addressed in the NASW Code of Ethics. The NASW Code of
Ethics is included in the Appendix of the MSW Field Manual & MSW Student Handbook.
Professional and Ethical Behavior of MSW Students in Field Placements

Field Education in the community involves not only the social work program’s educational objectives for the student and faculty, but also encompasses serious professional responsibilities to consumers/clients, social work agencies, and the public.

Field placements are serious business. This is a major component of your social work education. Field is where you get the opportunity to put into practice what you have been learning in your classes, and the beginning of the shift from student to professional. Because of that, you will be expected to display professional behaviors in field, similar to what would be expected of a regular employee.

As a social work student, you are also expected to display professional behavior consistent with the [NASW Code of Ethics](https://nasw.org/about-nasw/ethics/code-of-ethics), the [KSU University Graduate Catalog](https://www.kennesaw.edu/graduatecatalog), [MSW Student Handbook](https://www.kennesaw.edu/offices/social-work-handbook), and [MSW Field Practicum Manual and KSU MSW Field Education’s Professional Standards and Ethical behaviors](https://www.kennesaw.edu/offices/social-work-manuals). When you are working at your field placement, not only do you represent yourself, but you represent the Department of Social Work and Human Services and every other student that will come after you.

Unfortunately, one student’s poor professional behavior can result in the loss of a placement as an option for future students. Because of that, the MSW Program takes your professional behavior in the field very seriously.

Professional behavior is also a component of your supervisor’s evaluation of your performance in field and therefore directly related to your advancement in/completion of the social work program.

It is therefore important to recognize early and respond quickly to problems in performance of students. When the student is performing poorly in field placement, service needs of consumers/clients must become the highest priority. Field Faculty Instructors and Agency Supervisors will take action to protect the needs of consumers/clients and ensure appropriate and ethical service delivery. Students who are assessed as providing inadequate performance in the field are subject to the following:

- provided with corrective and supportive services to assist them to improve their performance;
- dismissal from their field placement and potentially from the MSW program.

Student Internship Interview Process

Following the interview with the Field Director, generalist and specialization students must adhere to the following guidelines:

- Prepare a current resume.
- The Field Education Director contacts the agency to which an individual student is referred for an interview. Note: Students cannot solicit their own internship or contact the agency prior to receiving information from the Field Education Director. All placements are arranged through Field Education.
- Students are required to coordinate and complete field internship interviews with the agency. Students will contact the agency to schedule an interview with the agency primary contact/field supervisor. All students must complete an interview before placement at agency for a possible internship.
If a student is denied a placement following an interview, a second agency referral is made and the above process is repeated.

After a maximum of two denied placements, the generalist internship candidate meets with the Field Education Director regarding interview challenges and next steps.

- The Field Education Director will meet with the student to discuss feedback from agency supervisors. The purpose of the meeting will be to assess and address the issues identified by the field supervisors who interviewed the student and to assist the student in correcting or addressing such challenges. All students denied placements after two agency interviews will be referred to Career Services for additional assistance with preparing for an interview.
- Students will be given two additional agency sites to complete the same interview process as above.
- If the student is not accepted after four agencies interview the student must meet with the Director of Field Education to determine their readiness for the MSW Program and field internship. If the issue is not resolved, it will be referred to the MSW Program Director.
- Additionally, students are not allowed to enroll in courses in the MSW Program without securing a field internship placement.

All internships MUST be secured prior to the beginning of the Academic year.

**Generalist Internship**

Generalist students are eligible for field internship placements upon admission to the MSW program. Generalist students are contacted by the Field Education Director approximately one month prior to the New Student Orientation. Students will receive an email with instruction on completing the Generalist Field Education Application. Students will submit the completed application to the Field Education Director at the New Student Orientation and schedule a virtual interview with the MSW Field Education Director to discuss the placement process, student interest and internship opportunities.

A referral to one agency is made after an interview with the field education director and consideration of work and educational background, interests, and availability of field placement agencies. The Office of Field Education cannot guarantee students are placed in one of their preferred agencies, all generalist internships are based on agencies that best corresponds with a student’s learning needs. Students are notified of their placement match via email to their KSU email account.

**Generalist intern students will also adhere to the following guidelines:**

1. Students will attend new student orientation scheduled within one month of acceptance to the program.
2. Students will attend new student field internship orientation scheduled the first week of classes in the fall semester
3. Students are required to review the Field Education Manual
4. Students must complete any required agency orientation/trainings and submit all documentation prior to the beginning of the field placement.
5. If any problem arises in this process, immediately notify the Field Education Director.
Specialization Internship
As a prerequisite for specialization internship placements, all students must successfully complete both the generalist course work and internship requirements, complete the Specialization Field Education application, and interview with the Field Education Director.

Students are contacted in November of the Generalist year during field seminar to discuss the process for Specialization internship. Students are provided the Specialization Field Education application and informed of the deadline to submit their field education application. At that time, students will sign up for spring semester interviews with the Field Education Director to discuss 2nd year field internship opportunities.

At the meeting the Field Education Director will provide leadership to and guiding the student through the specialization internship placement process. The student will discuss their three top choices identified on the Specialization Year Field Education Application. The Field Education Director will review how well the student’s choices match with the learning opportunities available in the field placement and the “goodness of fit” with the field supervisor and agency, including the style of supervision needed.

Referrals to two different agencies are made after an interview with the field education director and consideration of work and educational background, interests, and availability of field placement agencies. The Office of Field Education cannot guarantee students are placed in one of their top three choices, all specialization year internships are based on agencies that best corresponds with student learning. Students are notified of their placement match via email to their KSU email account.

Specialization intern students will also adhere to the following guidelines:
1. The student will complete and return the Agency Interview Feedback Choice Form to the Field Education Director within 5 days of the completing both interviews
2. Students will attend Specialization year student field internship orientation scheduled the first week of classes in the fall semester
3. Students will review the Field Education Manual
4. Students must complete any required agency orientation/trainings and submit all documentation prior to the beginning of the field placement.
5. If any problem arises in this process, immediately notify the Field Education Director.

Preparing for the Agency Interview
Prior to the agency interview, the Director of Field Education meets with students to discuss the agency interview process. Students can request a meeting with a representative from the KSU Career Services Center to discuss interviewing techniques and other relevant issues. The Director of Field Education engages the students in discussion about the NASW Code of Ethics, NASW Standards and Indicators on Cultural Competence in Social Work Practice in an effort to begin the process of recognizing, understanding, and managing personal biases that may affect their therapeutic relationships with clients.

Prior to the Interview
1. Research the organization to review the agency mission, goals, and services.
2. Review the MSW Field Education Manual
5. Students schedule the interview after receiving the agency contact information from the Office of Field Education. If the designated contact person cannot be reached, students find out that person’s availability and call back accordingly. A student should also leave his/her name, a return telephone number, and the best time to be reached when leaving phone messages. Students are to indicate that they are a potential KSU MSW intern.

6. Once the appointment with the potential agency is confirmed, the placement interview should be conducted as a job interview, which requires appropriate professional attire and behavior.

At the Interview

1. Present in a professional manner during the interview
2. Bring copies of your resume
3. During the interview, students learn the educational requirements and opportunities available at the agency. The interview is a two-way process. Students must have clear goals and learning priorities and be prepared to ask specific questions about:
   - Role of MSW student intern (inquire about student tasks during internship)
   - Learning experiences student can expect; how gradual assignment of professional tasks will likely proceed; skills that can be developed
   - Service delivery; clients served, type of setting (structured vs. unstructured),
   - Your responsibility for any orientation or pre-placement activities prior to interning (such as background checks, insurance coverage, immunizations, specialized trainings)
   - Weekly supervisory meetings with field supervisor, who might it be with, what that might look like; methods of supervision, and supervisory expectations, etc.
4. Students must be prepared to discuss their background, educational and career goals, and why they are interested in the agency and answer questions about:
   - What is your level of social work experience to date? Experience?
   - What do you hope to get out of a field placement in this agency?
   - What are your strengths and weaknesses in dealing with people?
   - What type and field of social work job will you be seeking upon graduation?
   - What type of supervision do you prefer?
   - What are your time availability and constraints?
   - What is your interest in the target groups served by this agency?
   - What is your level of knowledge about the needs of certain vulnerable groups, such as minorities, youngsters and women (i.e. what barriers do they face)?
   - What is your ability to work both independently and in teams?
5. Agency supervisor/primary contact person assess students’ level of interests and suitability for the learning experiences available at the agency. If there are clear reservations about the “goodness of fit” between the agency and the student, the agency informs the Director of Field Education via the Agency Intern Interview Feedback form.

After the Interview

It is strongly recommended to send a thank you letter after your interview. The student should not contact the agency to inquire if they have been accepted by the agency. The student will be notified by the Field Education Director of their internship placement acceptance. Students will be notified of their generalist internship placements by July 15th and specialization internship placements by April 30th. Occasionally, there could be potential delays in notification of internship placements.
Confirming Internship Placement

Generalist year students are automatically placed at internships in which they are accepted by the agency supervisor. However, specialization year students are placed at internship sites based on their choice and acceptance by the agency supervisor. On occasions, specialization students may not be placed at their top choices due to not being accepted by the agency field supervisor. No student will be placed at an agency in which the agency supervisor did not accept the student.

A student cannot decline a placement in which they have been accepted to obtain additional agency referrals. If the Field Education Director has determined that an agency offered to a student is the best available match for the student, the student may not refuse that placement assignment for non-educational reasons.

Once the student receives the field education internship placement letter from the Field Education Director they must contact the assigned agency supervisor to confirm acceptance. Once students have made a commitment to their respective agencies, students are expected to complete their field placement in that agency.

If there is an identified problem at the agency before the field internship begins, the student and/or agency supervisor must contact the Field Education Director immediately.

Criteria for Agency Selection and Agency Supervisor Approval

Prior to a student being placed with any agency or organization for internship, the agency must subscribe to the following guidelines, which are derived from the Council on Social Work Education, NASW Code of Ethics and KSU:

Prerequisites for Agency Selection and Approval

- The agency does not discriminate in hiring or service delivery on the basis of race, creed, gender, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran, and the selection, assignment and education of students.
- The agency is defined as an organization that is:
  - Public agency
  - Governmental agencies (city, state, and/or federal)
  - Non-profit
  - For-profit
  - LLC private group agency
- The agency is not defined as a solo practitioner in private practice.
- The agency will provide appropriate opportunities for students to work with diverse client populations.
- The agency should be able to assure the availability of an appropriate variety, quality and quantity of practice learning experiences with individuals, families, groups, organizations, and communities.
- Whenever possible, the agency will assure that students will be given the opportunity to work with people of color, lesbian/gay/bisexual/transgender, other oppressed populations and/or rural communities.
□ The agency interviews and approves students’ proposals for placement consistent with agency and KSU policies regarding nondiscrimination.
□ The agency allows students to practice within the NASW Code of Ethics.
□ The agency provides necessary office space, telephone, and other office support to allow students to function effectively in the internship, and agrees to reimburse students for expenses incurred on agency business.
□ The agency provides an orientation for students, KSU faculty field mentors and/or the Director of Field Education that addresses agency rules, regulations, procedures, facilities and equipment.
□ The agency provides meaningful and challenging learning activities respective to the course objectives for generalist and Specialization internships.
□ The agency will assign a MSW or LCSW agency supervisor responsible for providing a minimum of one hour of face-to-face or virtual (only if the supervisor has completed all required training) supervision per week.
□ The agency must notify the field faculty instructor and/or Field Education Director when there is a change with the designated agency supervisors.
□ The agency consents to students leaving the agency, if necessary, to obtain learning experiences unavailable in the agency.
□ The agency gives students time off to attend internship related meetings with the understanding that the internship hours are made up.
□ The agency allows students to work with staff members within the agency and with outside resources significant to the agency’s services.
□ The agency will provide an increase in the complexity of tasks as students gain confidence and competency.
□ The agency will only bill third-party payee for services rendered by student intern(s) that are legally allowable in the state of GA. Also, in accordance with GA Composite Board and Council on Social Work Education (CSWE) Educational Policy and Accreditation Standards. (Please see: https://www.cswe.org/getattachment/Accreditation/2014-02-25AnnouncementreDOLandField-EF.pdf.aspx)
□ Whenever possible, the agency may provide students with financial support in the practicum placement. Although it is not required, it is strongly encouraged that agencies provide financial support to student intern(s) in which the agency bill third-party payee for student (intern(s) services rendered. Internships that provide financial support are subject to the following guidelines/restrictions/requirements:
  o The agency will not hire the student intern(s) as an employee while the student intern(s) is actively enrolled in the KSU MSW Field Internship course.
  o Planning and prior approval are required. Requests for financially supported placements are made to the Field Education Director.
  o Student fieldwork must be educationally oriented, designed to meet the educational needs of the student and the educational objectives of the Social Work Department, as outlined for field instruction.
The decision to offer financial support, and the amount offered, is entirely up to individual agencies. These funds should be paid directly to students as stipend.

Agencies’ ability to offer, or not offer, financial support, will not affect their standing with the Social Work Department as a field placement site. Agencies approved as placement sites need to continue to meet the criteria established for field instruction.

Students in financially supported field experience, and agencies providing the support, must conform to all policies, procedures, and expectations outlined for students in field internship placements.

The student’s learning plan is used throughout the internship as an educational tool as well as for any issues that may require clarification or problem solving related to student performance or the tasks and assignments given to the students during field work.

Whether an internship must be paid or unpaid is a decision for the agency. For information on that question, please see the GA Composite Board and Council on Social Work Education (CSWE) Educational Policy and Accreditation Standards. Also: https://www.cswe.org/getattachment/Accreditation/2014-2015-Announcement.pdf.aspx

Prerequisites for Agency Supervisor Selection and Approval
The person designated as the agency supervisor by the approved agency serves as a key partner in the field education program to prepare students to become competent social work practitioners. The essential role and responsibility of the agency supervisor is to collaborate with the field faculty field instructor to provide students with vital on-site learning experiences and opportunities for professional growth and development. Most importantly, the agency supervisor is to exemplify the values, ethics, knowledge and skills of the social work profession.

At minimum, agency supervisors are expected to hold a MSW degree with a minimum of two years of post MSW experience. The minimum requirements for Specialization year student interns’ agency supervisor is an LCSW.

Process for Becoming an Agency Supervisor for MSW Student Interns

☐ The agency completes application for approval as internship site.

☐ Upon agency approval, interested staff who meet the criteria to become an agency supervisor submit a Credentials Form or resume to the Office of Field Education and attend an orientation for agency supervisors prior to providing supervision to any graduate MSW interns.

☐ The potential supervisor must exhibit a willingness to mentor challenging as well as exceptional graduate interns.

☐ The potential supervisor understands the importance of social work education and the MSW curriculum at KSU.

☐ The potential supervisor understands of the role of agency supervisor as an opportunity to learn and grow professionally and personally.
The potential supervisor shows a willingness to examine his/her own supervisory styles and approaches, handle day-to-day situations with the student, and his/her commitment to the standards of social work education and practice. The potential supervisor maintains cordial working relationships with colleagues. The potential supervisor manages his/her current workload at a satisfactory level while providing a minimum of one hour of supervision per week to each intern as well as group supervision when appropriate. All **generalist year intern(s)** supervisors must have a MSW/LMSW with two-year post MSW experience. Other graduate level disciplines such as LPC’s or LMFT’s, may provide daily/task supervision. All **specialization year intern(s)** supervisors must have an LCSW. Other graduate level disciplines such as LPC’s or LMFT’s, may provide daily/task supervision.

**Agency Supervisor Responsibilities**
- Attend the required Supervisor Field Program-sponsored training for supervisors each year in the fall.
- Meet weekly with the intern for a minimum of one (1) hour of supervision for both generalist and Specialization interns
- The agency supervisor will orient students to the administrative structure, policies, purposes and services of the agency.
- The agency supervisor will identify tasks and learning opportunities within and outside the agency setting.
- The agency supervisor will support and encourage students to interact both formally and informally with other members of the agency and to attend community workshops of special interest to individual students and the placement agency.
- The agency supervisor will monitor all assignments by offering appropriate direction and coordination.
- The agency supervisor will provide consultation sessions designed to enhance students’ learning and performance.
- The agency supervisor will require accountability for practice behaviors while in the field placement.
- The agency will not hire any student while the student intern is actively enrolled in the KSU MSW Field Internship course and interning at the agency.
- The agency supervisor will assess students’ competence by completing written evaluations for each student.

The agency supervisor will complete and submit all required field education documentation on time (i.e., timesheet, supervisor expectations, student placement agreement). If serious concerns about a student’s ability to meet professional expectations are identified, document such concerns and follow protocol in developing an intervention plan to seek remediation of the concerns.

**Employment-Based Internships**
Students seeking a field internship experience in their place of employment must receive approval by the Field Education department. While this is not always the ideal situation, there are times when a field practicum assignment in places of employment can be beneficial for the student. Therefore, field
Internship assignments in places of employment must be educationally focused and structured appropriately to achieve the goals and objectives of the field internship course.

Students interested in worksite internships must submit in writing to the Field Education Director their request for Employment-based Internship by November 30th for specialization year placements and immediately upon acceptance into the MSW Program for generalist year placements. Submitting this request does not guarantee approval of the request. All requests are considered on a case-by-case basis. Final approval will require completion of additional forms. Students may have their internship located within their employing agency if the following conditions are met and approved by the MSW Field Director:

- The agency is currently an approved internship agency.
- The intended agency placement is administered in accordance with the same guidelines established for all other students.
- The student, assigned field faculty field instructor, and the Office of Field Education are assured that the student and the agency supervisor will have release time for academic and field supervision respectively.
- Field placement assignments and instruction are educationally focused field internship.
- The activities and assignments for fieldwork are specifically related to the internship course objectives.
- The agency must be able to provide a placement experience that meet the requirements for generalist and/or Specialization field internships.
- The agency supervisor meets the criteria established for field agency supervisor’s.
- The activities and assignments for the internship are clearly delineated and separate from other work assignments:
  - Consisting of a different set of tasks
  - Located in a different work unit or division; and
  - Field Agency Supervisor is different that the student’s current employment supervisor
- The agency must be willing to allow the field supervisor to attend field education training and have sufficient time to provide the minimum of at least one hour/week supervision for the student.
- The agency and student will sign a Release of Information from the student with their place of employment. Additionally, if the student is terminated as an employee the student must understand this is an automatic termination as MSW student intern.
- If the above criteria are met, final approval will require completion of additional forms. All forms must be received by the deadline. Once the application is submitted to the Office of Field Education, it will be reviewed and a response will be given as soon as possible to indicate whether the placement has been approved. A site visit may be required as part of the application review process prior to determining approval.
- Students must complete a Release of Information from their employer to KSU.
- Each proposal that meets the above criteria is examined on its own merits.

**Exclusions from Employment-Based Placement include:**

- Agencies that are very small or are highly-specialized private practice settings;
- Agencies owned and/or operated by student’s relatives (marriage or birth);
- Students who are in a position of authority (CEO, Director, etc.) or are self-employed;
- Agencies that have existed for less than 1 year and/or have not yet developed or implemented formal operating policies and procedures; and
Agencies under investigation or that have been sanctioned for fraudulent or unethical activities.

Credit for Work Experience
In accordance with the Council for Social Work Education standards, no credit is given for prior work or life experiences.

National and International Field Internships
Currently, the field education program does not have any approved internship placements located out of state or internationally. Therefore, students are not allowed to complete internships out of state or internationally.

Criminal Background
Due to accreditation standards and/or agency policies, many field placement agencies require one or more of the following: criminal history check, drug screening, and verification of health status. Students will not be allowed to participate in their field education practicum in agencies that require these checks/screenings unless the student consents to and completes the required check, screening, or health care verification before beginning the field placement. In addition, some agencies might choose to complete random checks and screenings throughout the course of a placement. To continue in the placement, the student must consent to a check/screening on the schedule requested by the agency.

A criminal history could be grounds for an agency declining to accept or terminate a student. As a result, the Field Education Office may be unable to identify a field placement for a student with a criminal history. If a field placement cannot be identified, completion of degree requirements is not possible, and the student will not receive the MSW. Additionally, students with criminal histories may not be able to obtain social work licensure in Georgia or other states post-graduation. For guidance on this matter, students are advised to check the appropriate board of the state in which they are seeking licensure/certification.

Some field placement agencies require that the student pay for the criminal record check and/or other fees associated with these requirements. In this case, the student will not be reimbursed by the University.

Please see Criminal Background Policy

A student must immediately notify their agency supervisor if they are arrested and/or convicted of any crime while completing their internship at the agency. Disciplinary action, including termination of a field placement and/or removal from the social work program may be the outcome if a student is arrested and/or convicted while completing their internship. Additionally, failure to report such behavior to their field supervisor may result in disciplinary action, including termination of a field placement and/or removal from the social work program.

Drug Screening
Some field placement agencies require drug screening of students placed with their agency. It is the student’s responsibility to inquire about drug screening requirements during the placement interview with the field instructor. Of the agencies that require screening, some conduct the drug screening themselves and some agencies require that the student obtain their own screening and provide the agency and/or the field office with the results. Students may be able to have a drug screen done by their personal physician. Other vendors may also be used for drug screening; however, the student should first confirm with the agency/field instructor whether the proposed vendor meets the agency’s
requirements. Unless the field placement conducts the screening itself or chooses to pay for the screening, the student is responsible for the cost of the drug screen.

Should an agency refuse to accept a student for placement or retain a student intern (in the case of a random screen) due to the results of a drug screen, and such drug screen has been verified by the drug-screening vendor’s medical review officer, the student must contact the Field Education Director who will consult with the MSW Program Director and/or Department Chair to discuss a plan of action. The Field Education Director and MSW Program Director will make a plan with the student regarding continued matriculation in the MSW Program. Only on completion of this plan may the student once again be referred for a field placement. Given the time required to complete this lengthy process, students need to be aware that their matriculation in the program might be delayed.

In addition, any criminal charges because of drug or alcohol use that occur while a student is interning at an agency as a student at KSU may result in disciplinary action, including termination of a field placement and removal from the social work program.

Insurance

*Professional Liability* – KSU MSW program provides a blanket professional liability insurance policy for all students through the National Association of Social Workers who are completing an internship at an approved site. All students must be enrolled in SW 7708, SW 7709, SW 8712, and SW 8713S and are not covered for tasks they agree to perform outside of or after they have received the grade for the course. Students may also purchase additional professional liability insurance.

*Automobile Liability* – Students are not covered by the University’s automobile insurance policies. Students are expected to purchase their own auto insurance. Additionally, students are not allowed to transport clients. Therefore, the student is responsible for any expenses incurred while performing field duties.

*Medical/Mental Health Coverage* – Students have the option of medical coverage by the University. However, all enrolled students have free access to the University’s Counseling and Psychological Services. Please contact KSU Counseling and Psychological Services for more information.

Agency Conflict of Interest

The MSW Program believes it is not in the student’s, agency’s or the clients’ best interests to allow a student to complete an internship at an agency where the student or family members currently work (See Employed-based internships) and/or have been a consumer of services. Therefore, a student is not permitted to complete their field internship at an agency where they or family members were former consumers of services or family members are currently employed.

Additionally, students are not permitted to complete their field education work in an agency or institution owned by a family member. Therefore, a student’s family member may not serve as a field and/or task supervisor for the student. Students are obligated to notify the field education office if a family member is employed in any capacity with the placement agency, organization, or institution.

Agency Assignment Procedure for Students with Disabilities

As required by federal and state law and KSU policy, internship placements must be accessible to students with disabilities. This requirement means that students with disabilities should have the same kinds of educational opportunities - including field placements. However, given the wide range of disabilities, it is possible that not every placement will have the capability to accommodate every student.
It may not be feasible, for example, for a site to accommodate students who use wheelchairs because of the site’s location and existing architecture, but this same site could easily accommodate students with visual or hearing impairments. Every effort is made by the Office of Field Education to ensure equal access to internship opportunities.

Students with special needs must contact KSU Student Disability Services and the Director of Field Education after being accepted into the MSW program to discuss accommodations that may be necessary in the internship site. However, if accommodations are granted in the classroom the field education program cannot guarantee the field agencies will adhere to these accommodations in the field internships.

Student Disability Services
Kennesaw Hall, Room 1209
(470) 578-3197
8:00 am to 5:00 pm (Monday – Friday)

Please visit the Student Disabilities Services website at http://sds.kennesaw.edu/index.php for more information.

If a MSW student registers with KSU Student Disability Services (SDS), The Office of Field Education will not disclose any information to the field agencies. It is the students’ responsibility to disclose any information regarding their disability and request accommodations.

Additional Field Placements
The Social Work Program does not allow for additional field placements for students in the program and are on track to complete the 60 credit hours required for graduation. Students interested in additional training are encouraged to volunteer and/or apply for post-graduate fellowships.

DURING THE FIELD PLACEMENT

Required Paperwork
Students and Field Supervisors will be asked to complete and submit the following forms during field placement. Blank forms can be found on the Department of Social Work and Human Services website; please ensure that you download the version appropriate to the student’s level (Generalist or Specialization.)

- **Field Supervisor Expectations and Guidelines Form:** This agreement outlines the general expectations of the Field Supervisor, and Task Supervisor (if applicable). Please see field education calendar for the due date to the field faculty instructor.
- **Field Placement Agreement Form:** This agreement outlines the general expectations of the student, Field Supervisor, and Task Supervisor (if applicable) including the start and end dates and required number of hours for the field placement. Please see field education calendar for the due date to the field faculty instructor.
- **Learning Contract:** This form is a living document which defines the scope and focus of each student’s individual field experience. At the beginning of the field placement, the student and Field Supervisor list the tasks, activities, and projects in which the student will engage, and
relate each to the CSWE competencies and behaviors. Please see field education calendar for the due date to the field faculty instructor.

- **Mid-Semester Evaluation (Fall semester only):** Mid-way through the field placement, the student and Field Supervisor complete a mid-term evaluation to rate how the student is acclimating to the field placement. Please see field education calendar for the due date to the field faculty instructor.

- **Time Sheets:** All students are required to complete a timesheet to document their hours at the field internship. Please see field education calendar for the due date to the field faculty instructor.

- **Field Evaluation Form (Final Semester Evaluation):** At the end of the field placement, the Field Supervisor provides an evaluation of the student’s development based on the activities/task identified to meet the practice behaviors based on the 9 competencies. The student’s scores are based on their continued learning and development. The Field Supervisor should meet with the student to discuss the evaluation. Additionally, the field supervisor is asked to recommend a grade for the student’s field placement. Please see field education calendar for the due date to the field faculty instructor.

- **Additional Evaluation (students):** At the end of the field placement, students will complete an evaluation of the Field Education Program, including the performance of the Director of Field Education, the field supervisor, and the field agency in which the student was placed. This evaluation is in addition to the standard KSU course evaluation, which is sent to all students University-wide. Please see field education calendar for the due date to the field faculty instructor.

- **Additional Evaluation (Field Supervisors):** At the end of the field placement, Field Supervisors will complete an online evaluation of the Field Education Program and the Field Faculty Instructor with whom they worked and will provide feedback about the process for placing students with the agency and communicating with the MSW Program. A link to this evaluation will be provided via email from the Director of Field Education. Please see field education calendar for the due date to the field faculty instructor.

**Field Education General Policies and Procedures**

The MSW Program expects students to have a thorough orientation to their field agency before becoming involved in direct or indirect practice activities. It is also expected that students will be provided with a variety of micro, mezzo, and macro practice activities that reflect the nine CSWE competencies outlined in this manual. In addition, students should be given workloads that allow for the regular processing of their experiences, both through regular supervision and at other times as appropriate.

**Performance Standards for Students in Field Education**

In addition to agency policies and procedures, students are expected to adhere to the National Association of Social Workers (NASW) Code of Ethics and the KSU MSW Field Education’s Professional Standards and Ethical behaviors. The Code of Ethics is located at: [https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English](https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English)

**Student Impairments**

The NASW Code of Ethics explicitly states “social workers should not allow their personal problems, psychosocial distress, legal problems, substance use, or mental health difficulties interfere with their professional judgement and performance should immediately seek consultation and take appropriate remedial action by seeking professional help, making adjustments in workload, terminating practice, or taking any other steps necessary to protect clients and others.” Therefore, if a student is experiencing
any personal problems that places themselves, the agency and/or the clients at risk the student will be required to discontinue their activities at their internship until the problem is resolved. Additionally, the student will not be allowed to “attend” internship to only complete hours until the problem is resolved. Prior to returning to their field internship and resuming field activities, the student will be required to meet with their Field Faculty Instructor, Field Education Director, and the MSW Program Director to develop a plan of action. Only on completion of this plan may the student once again return to field placement. Given the time required to complete this process, students need to be aware that their matriculation in the program might be delayed.

**Field Faculty-Student Relationships**

The *NASW Code of Ethics* is clear regarding the character of professional relationships. In keeping with the spirit of the Code of our profession and in recognition of the power faculty potentially have over the academic careers of students, intimate relations between faculty and social work students are unacceptable.

Students who experience discomfort when observing or being subjected to a field faculty member's (1) personally directed sexually oriented remarks in or outside of the classroom or (2) inappropriate behaviors of a sexual nature, (i.e. intimate touching, kissing, caressing) are experiencing sexual harassment.

Further, field faculty are cautioned against behaviors that create the perception of sexual harassment. Under no circumstances is it acceptable for a faculty member to date a social work student. It is the belief of the Department of Social Work and Human Services that amorous relationships between faculty and their students, due to the natural power imbalance between faculty and students, could be potentially damaging to the student. Just as social work practitioners should not date their clients; field faculty should not date their students.

Students should follow the University’s policy on sexual harassment to report any inappropriate behaviors.

**Agency Staff-Student Relationships**

While in field placement, agency staff serve as Field Supervisors, Task Supervisors, and agency colleagues. As such, sexual harassment of a student by field agency staff is strictly prohibited. Field agency staff are to conduct themselves in a professional manner in all their dealings with KSU social work students. Dating between agency staff and students is not acceptable. Allegations by students regarding sexual harassment by agency staff should be reported to the student's Field Faculty Instructor, Field Education Director, and to the MSW Program Director.

**Student-Client Relationships**

The *Code of Ethics of the NASW* urges social workers to avoid dual relationships with clients whenever possible and states, “Dual or multiple relationships occur when social workers relate to clients in more than one relationship, whether professional, social, or business. Dual or multiple relationships can occur simultaneously or consecutively.” The *Code* also prohibits sexual relationships and sexual harassment between social worker and client (previous or current) and clients’ family members. Therefore, non-professional relations between social work students and agency clients or family members are unacceptable.
Freedom of Information
The MSW Program takes a collaborative approach to student learning. In the educational interest of the student, it is sometimes necessary to confer with faculty, staff, agency supervisors, and other agents of the University regarding the student’s academic progress and professional development. The purpose of these consultations is to support and assist the student in their educational endeavors. For more information, please refer to the KSU Policies and Procedures under the Family Educational Rights and Privacy Act of 1974.

Disclosure of Student Trainee Status
In accordance with the NASW Code of Ethics, social work students must identify themselves as student trainees to patients/clients either verbally or through the use of nametags and in signing notes in records or charts and all other documents produced by student trainees for or on behalf of the field agency.

Georgia HB 280, Campus Carry
In 2017, the Georgia legislation passed HB 220, allowing anyone who is properly licensed in the State of Georgia to carry a handgun in a concealed manner on property owned or leased by public colleges and universities, with some exceptions. This right is not extended for students in their field placements. Students in off-site agencies will abide by the agencies’ policies regarding the right to carry firearms on the agency site or on the property of agency clients.

Field Education Time Requirements
During the generalist year, students are expected to dedicate two full days per week on Mondays and Tuesdays (16 clock hours per week) for a minimum of 240 hours (Total 480) at the internship placement each semester.

- Generalist Internship (fall semester): minimum 240 hours (two 8-hour days per week for 15 weeks)
- Generalist Internship (spring semester): minimum 240 hours (two 8-hour days per week for 15 weeks)

During the specialization year, students are expected to dedicate three full days per week on Wednesdays, Thursdays, and Fridays (24 clock hours per week) for a minimum of 360 hours (Total 720) at the internship placement each semester.

- Specialization Internship (fall semester): minimum 360 hours (three 8-hour days per week for 15 weeks)
- Specialization Internship (spring semester): minimum 360 hours (three 8-hour days per week for 15 weeks)

Students may not carry field hours forward to the next semester. Students may not “bank” hours to complete the internship early. Therefore, students must remain at the agency until the end of the semester. Students are not allowed to work from home/telecommute. However, students may complete a maximum of 16 hours of online/webinar trainings per academic year. Otherwise, all hours must be completed at the approved internship site.

All students are required to complete a timesheet to document their hours at the field internship. The documentation of hours is utilized in monitoring advancement toward the completion of the prescribed hours in the field experience. At the end of each semester, students are required to submit the field faculty instructor the original timesheet signed by the student and agency supervisor and task supervisor. All students are required to submit a timesheet to pass the field seminar course.
**Falsification of Field Hours**

Falsification of field hours will result in a failing grade for the field seminar course and a referral to the Office of Student Conduct. All hours earned during the semester will be forfeited by the student. Approval to move forward in the MSW Program will be made by the MSW Review Committee.

**Student Schedules and Attendance**

The student and the field supervisor should work out the daily schedule for assignment to the agency during placement. The regular schedule established should allow the student opportunities to be actively involved in the agency's services, to participate in agency functions, and to attend campus seminars. Any needed variations in the regular, established schedule (e.g., attending night meetings, occasional weekend work, using compensatory time, etc.) must be planned and agreed upon in advance by the student and the field supervisor. Agency orientation should include procedures regarding student absences, arrangements for making up missed time, and requesting time off. The faculty of the Field Faculty Instructor and/or Field Education Director must be contacted if a student does not report to the agency as scheduled in the beginning of the semester and if there are frequent absences.

Lunch breaks are not counted as field hours unless they are an agency-required “working” luncheon meeting. Likewise, time spent commuting to and from the agency at the beginning and end of each scheduled work session may not be counted as field hours.

Students are expected to remain in the assigned agency from the beginning date of the semester until the ending date of that semester, for both fall and spring semesters. The field faculty instructor must be notified by the student of any extended absences (more than 3 days).

A conference will be arranged with assigned agency personnel, the Field Faculty Instructor, and the student in cases where there is significant concern about the ability of a student to function in an agency due to absences, illness, or other problem situations that may arise during placement.

**Holidays, Vacations, and Religious Holidays**

KSU has an established calendar of holidays and break periods. Students are expected to follow the official KSU holidays and breaks (Labor Day, Thanksgiving break, winter break, Martin Luther King Jr. Day, and spring break). However, there are exceptions, when agencies require students to attend their field placements during school break periods so that the client and agency relationships are maintained. This will be addressed on a case by case basis. It is expected that the student and agency supervisor will create a plan to address this issue. All parties should consult with the field faculty instructor for final approval of any alternative plans.

Vacations should be scheduled during university and internship site holidays. Student vacations scheduled during an academic semester may result in drop in grade and/or termination from the internship. However, any missed time during the semester must be made-up during the semester in which they were missed.

Students are authorized up to one excused absence each semester for religious observances. Students who wish to request more than one excused absence in a semester for religious observances will need to discuss with their field faculty instructor and field supervisor to request the additional absence; additional absences can be granted only by the student’s assigned field faculty instructor and the student will be required to make up the hours in the semester in which they were absent. Students
should notify their agency if they will not be in the agency on a day the student is participating in a religious observance required by their faith. Primary holy days for religious observance are noted on a Web-based interfaith calendar site at www.interfaithcalendar.org.

**Sick Leave and Personal Emergencies**
The MSW Program does not excuse students from the field experience for personal reasons (e.g., personal time, sick leave, bereavement, family crisis, weddings, or special events). Therefore, any missed time due to any sick leave or personal emergencies must be made up. Students requesting leave due to illness or family bereavement are expected to notify their field faculty instructor and agency supervisor before or on the day leave is used. Each agency supervisor determines what constitutes sufficient notice for a request of leave. Excessive absences due to leave time must be reported to the assigned field faculty instructor via e-mail.

Students should discuss the requirements for make-up during supervision with the agency supervisor and with the field faculty seminar instructor if they have concerns regarding this requirement.

Generalist year students have every Friday (days not in class or field placements) to make up time due to illness or emergencies and are expected to work with their agency supervisor to make up any time missed during their field practicum. The MSW program recognizes that specialization year students do not have as much flexibility to make up days missed during the semester. Therefore, planning make up days with their agency supervisor and field faculty instructor should be discussed and agreed upon prior to the end of the semester.

It is very important that every effort be made to treat all students (generalist and specialization) equitably regarding requests for an alteration in field time. Agency supervisors are requested not to make unilateral decisions about unusual requests for time off in the field even though it is understood that the student must make it up later. The agency supervisor should discuss such a request with the field faculty instructor who has a better overview of the total student group. Also, when any long absence is anticipated due to medical treatment, surgery, etc. this must be discussed with the field faculty instructor, with further planning carried on between the field faculty, student, and the field supervisor.

**Study Abroad**
Students planning to participate in Study Abroad programs should notify their agency supervisor at the start of the semester of these plans. While classes may be excused absences, field hours are NOT excused absences while participating in Study Abroad. Students must discuss with their agency supervisor how missed field internship hours will be made up in the semester in which they are absent.

**Inclement Weather/Breaks**
If the assigned field site is closed during inclement weather, students are not required to make up any missed field hours, up to a maximum of 8 hours per semester. If the agency is open during inclement weather, students should consider personal safety first when making decisions to travel to and from their agency. As always, your agency supervisor should be contacted as soon as possible if you find yourself in this situation. If a student chooses not to travel, the student must make up the missed hours by the end of the semester. You will be required to make up any hours missed if the University is open. Field supervisors are strongly encouraged to be flexible with students in planning for activities that would make up the hours. Questions about individual circumstances should be directed to the student’s assigned field faculty instructor.

**Dress Code**
Students must follow the same dress code required of agency employees. Students must adhere to the
placement agency’s policies regarding appearance such as professional dress, tattoos, or body piercings.

**Agency Reassignment Process**

If the agency supervisor, student and/or field faculty instructor believe that the agency is not appropriately meeting the educational needs of the student, a student may be reassigned to another agency. This action is taken only if it is documented that all efforts have been made by all parties to correct the problem.

A meeting with the student, field faculty field instructor, agency field supervisor, and the Field Education Director must be held to discuss the concerns. Any change of placement is coordinated with the Field Education Director (Reassignment is only approved for educational reasons). The placement site for students under these circumstances is selected solely by the Field Education Director. If a student is reassigned to a new agency, there will be a delay in securing another placement for the student. The timing of the delay is dependent upon the time that it takes to secure the new placement and may be several weeks. Student must make-up all hours missed during this process. For reassignment to a new agency a new Learning Plan must be completed within the first month of placement. An evaluation is also required from the initial placement agency.

Students terminated by a field agency due to performance do not follow under these guidelines. In addition, under no circumstances is the student to quit an internship assignment before consulting with their field faculty instructor and/or the Field Education Director.

**Repeating Placements**

Students are discouraged from completing their field placement in one agency setting/department for two year-long placements. A special written request must be made to the Field Education Director outlining the rationale for completing field requirements in the same agency twice, specifically explaining how specialization year learning objectives will be achieved and **what new learning opportunities** will be available. Students are required to use **different MSW/LCSW supervisors** for their generalist year and specialization year field placements. Submitting this request does not guarantee approval of the request. All requests are considered on a case-by-case basis. The request must be submitted to the Field Education Director by November 30th.

**Injury While in Field Placement**

Medical services that may be required by a student due to injury occurring while performing field duties are usually not covered by the agency (unless the student is employed by the agency and covered by Workman’s Compensation), and not covered by Kennesaw State University. The student’s own medical insurance may or may not cover the medical treatment depending on the insurance plan.

**Procedures for Reporting an Incident**

If an incident occurs in which a student is threatened or hurt, the student threatens or hurt a client or agency staff, the agency field supervisor must contact the student’s field faculty instructor and/or the Field Education Director immediately to discuss what actions the agency and MSW Program must take to address the issue.

All parties involved should document accordingly and submit the documentation to the Field Faculty Instructor. The documentation must include the incident and the steps taken to address it. The Field Education Director will meet with the student, field faculty instructor, and agency field supervisor to
discuss the situation, assess the immediate and ongoing risk, and find a resolution that promotes the student’s sense of well-being and the learning process.

**Communicable Diseases & Exposure Incidents**

If a student is diagnosed with a contagious disease and a physician informs the student that this illness could be spread by casual contact and could seriously endanger the health of others, including staff or clients at the field agency, the student is required to report this information to the Field Faculty Instructor and Field Education Director and to cease attending the field placement. Subsequently, the student should ensure that a written report from the physician is sent to the Field Faculty Instructor and Field Education Director explaining the issues regarding the illness and public contact.

The Field Education Director, in consultation with the assigned field faculty instructor, and student, will develop a plan to determine whether the student can or cannot continue in the field placement based on the nature and severity of the illness. If the student is temporarily unable to continue in their field placement, a plan will be developed to determine how the student can complete the required hours when no longer contagious.

Before returning to the field placement, it is the student’s responsibility to provide the field faculty and Field Education Director with documentation from a physician stating that the student is no longer contagious or presents a health risk to others.

**Safety Issues**

The MSW Program is aware of risk to agency staff and students in situations regarding contact with the public and in the field of social work. These risks are reviewed during field orientation with students. Students need to be aware of the need for personal safety to act in a manner to minimize risks whenever possible.

Agency supervisors must include a discussion of safety issues and steps that students can take to minimize risk within their organization as part of the student orientation to the agency.

Students are not permitted to transport clients in their personal vehicles under any circumstances.

If a situation should occur where a student or client experiences a safety issue, it should be reported immediately to the field faculty instructor and/or the Field Education Director and written documentation should be submitted by the student and agency supervisor within 48 hours of the incident. The Field Education Director will notify the Director of the MSW Program.

**Transportation**

Students are responsible for transportation to and from the agency. However, unless prevented by law or agency policy, it is expected that the student assumes the expenses for all agency-delegated activities that include travel. The Social Work Department does not reimburse students for field travel expenses. Students are not allowed to transport clients in their own automobiles or drive agency vehicles to transport clients.

**Home Visits**

Students in Field Education are to perform duties and tasks expected of a professional social worker including, but not limited to, home visits, community-based meetings, staff development, and documentation as they represent valuable learning opportunities. Students are not allowed to complete home visits alone, they must always be accompanied by an agency staff member. However, when completing a home visit the student is expected to follow agency guidelines on home visits like those followed by agency staff members. To guide the student and the
agency, the following safety principles are strongly suggested:

1. All home visits must be made with the full knowledge of the agency.
2. The supervisor should be aware of time of departure, time of return, and other activities on the trip.
3. Students should know how to access a supervisor always while conducting a home visit.
4. Students should not conduct a home visit if they feel threatened or if they detect the presence of drugs or alcohol.
5. Students should be aware of dogs or other household pets which may be a threat.
6. Students should know whom to call and what steps to take if they should experience a vehicle breakdown.
7. **STUDENTS SHOULD NOT TAKE RISKS.**

Students who feel they are being asked to conduct home visits that do not follow these guidelines are urged to discuss the situation with their agency field supervisor. If the situation cannot be resolved, then students should consult their field faculty instructor. If an agency is unable to accommodate the safety of a field student, the field placement may be terminated.

**Sexual Harassment Reporting Procedure**

Any individual who believes they have been sexually harassed by their agency field supervisor or any agency staff should report their complaint to the Field Education Director and/or MSW Program Director and/or their field faculty instructor. However, in cases where the accusation is made against the Field Faculty Instructor, Field Education Director, MSW Program Director or Field Faculty Instructor, the Chair of the Department of Social Work and Human Services and/or the Dean should be contacted. All complaints regarding sexual harassment will be reported per the University's policy.

**Mandated Reporting & Training**

The State of Georgia has laws that cover mandatory reporting of suspected child or elder abuse and the duty to warn if a client is harmful to self or others. Field agency supervisors are responsible for educating all students regarding their agency’s policy and procedures related to these laws.

Students should not be required to be the primary mandated reporter without the assistance of a staff at the agency while functioning as an intern in a field placement. This role is reserved for field site personnel who are responsible for ensuring that all field placement policies, regulations, laws, and ethical obligations are followed. (Students who have concerns about how these policies are being carried out in the agency, on a case-by-case basis, should contact their assigned field faculty instructor.) When possible, the student can assist and should have exposure to situations that involve mandatory reporting and duty to warn.

All students enrolled into the MSW Program are required to complete a mandated reporting training in the fall of their generalist year in the field seminar course. All information regarding this training will be provided in the SW 7708 course.

**Night and Weekend Placements**

There are minimal approved sites that offer night and weekend hours. These agencies are few and under no circumstance will the educational objectives of the curriculum be compromised to allow students to secure non-traditional placements. Agency supervisors must be available to provide weekly supervision for the students.
Title IV-E Child Welfare Placement Requirements
Title IV-E students must complete at least one field placement at a State of Georgia Division of Family and Children Services (DFCS) site that is approved by the KSU MSW Program and DFCS. This placement must be completed in the generalist year of field internship (SW 7708 and SW 7709).

Under no circumstances are students allowed to meet the Title IV-E field internship requirements in the specialization year field internship (SW 8712 and SW 8713) placements.

School Social Work Placements
Students completing internship placements in school settings adhere to the school district’s calendar and must take their breaks on the school’s and not the university’s schedule. However, the total number of clock hours for internship must still be met.

Hospital/Medical Center Placements
Increasingly, hospitals and medical centers are requiring that student interns provide proof of liability/malpractice insurance before a placement can begin. In addition, they usually need a completed background check, proof of certain immunizations and specialized training to be completed. During the field placement interview, students need to inquire about required liability coverage, background checks and specialized training (e.g., airborne pathogens, universal precautions). Students who accept internship positions at agencies that require immunizations, specialized training, background checks, proof of health insurance, or any other trainings/documents are financially responsible for obtaining those required documents, unless the agency is willing to do so.

Social Media and Technology Guidelines in Social Work Practice
Social media channels, such as Facebook, Twitter, YouTube, Snapchat, and various blog sites are just a few examples of new and exciting ways to connect with others and share information. Likewise, technology has broadened social workers’ capacity to assess and manage information about clients, influence policy, address social justice issues, and receive supervision. However, the rapid growth of social media communication tools and their ease of accessibility can also have unintended and potentially damaging consequences if basic guidelines are ignored. Students are expected to adhere to social work values, ethics, and engage in professional conduct as outlined in the NASW Code of Ethics. In addition, NASW, ASWB, CSWE, CSWA recently released the Standards for Technology in Social Work Practice (hereafter referred to as Technology Standards) when using social media communication tools and related technology. These two sources provide guidance to students and practitioners regarding the use of social media and technology. The Technology Standards address many issues, including accurate representation of self, informed consent, privacy and confidentiality, conflicts of interest and dual relationships, separation of personal and professional communications, use of search engines, and accessing client records remotely, to name just a few. Utilizing technology and social media as a social work professional requires ongoing attention to numerous ethical challenges.

As a social work professional, it is important to consider whether you are using social media channels and technology for professional activities such as advancing social justice issues, advocating for vulnerable populations and promoting your professional identity versus using these sites to maintain contact with friends and family. Your professional image, that is, the professional self you develop that is guided by social work values and ethical standards, extends beyond the field agency and physical setting of an office. As social workers, we must be cognizant that the legal, ethical and clinical responsibilities we have as professionals and that those obligations extend to the virtual world of the Internet and include the use of social media communication tools. As with the Hippocratic oath to “first do no harm,” it is imperative to consider how to be connected within the context of social media.
along with unrestricted access to information on the Internet, and while protecting yourself, your field site, your clients, the Department of Social Work and Human Services, and the profession.

As you get started in your field placement, it may be helpful to explore the following questions with your field instructor and/or task supervisor.

1. Does your field site have a policy on the use of social media and technology? If so, review the policy with your field instructor. If not, what expectation does the agency have regarding the use of social media and technology during field hours?
2. How much personal information is shared with clients and former clients as well as agency staff and professional colleagues?
3. What are the most common ethical concerns you should be aware of when using social media and technology as a professional social worker?

To help facilitate these conversations, consider the following topics for discussion with your field instructor and/or task supervisor.

**What are the agency guidelines regarding the use of Facebook and who can you friend?**
Managing friend requests and maintaining privacy settings is critical regardless of whether you use social media for personal and/or professional reasons. Allowing clients, former clients, or others in your professional circle to cross into your personal life may complicate and blur your professional boundaries. This is particularly tricky when managing Facebook accounts. As a professional, you must fully consider the extent of your privacy settings, how you will manage friend requests, your level of self-disclosure, and how you will monitor wall posts or other interactions on your site. Be aware that if you do not employ any privacy settings on your social media site, your profile is public and anyone can see what is on your page. Additionally, people can see when you are tagged in photos, view comments made by others, note your status updates and see who you’ve friended. All professionals must evaluate the scope of their social media connections. Since this is still an emerging professional topic, some professionals may be cautious and guarded in their use of social media while others may be more open and exposed. It is your responsibility as a professional social worker to abide by the Code of Ethics and Technology Standards, including your virtual communications and use social work values and principles to guide your interactions.

**What privacy and confidentiality concerns should I consider when texting, emailing and/or using Twitter or Snapchat?**
With the proliferation of hand held devices, accessing the Internet and connecting with others is literally in the palm of our hands. Text, email, Twitter, and Snapchat are quick and effective ways to communicate with others however many ethical, legal, and clinical issues must be addressed when using these communication tools. There is a huge potential for unintentionally sharing protected information so always use good ethical judgment. Be cautious about discussing information about your field placement, classroom work, or agency staff on your cell phone. Do not discuss confidential or private information about clients, colleagues, or agency practices even if you are disguising the information. In general, consider the security, privacy and confidentiality of all communication methods and when in doubt, seek consultation and supervision before embarking into unfamiliar or uncertain areas.

**Can I check my personal social media accounts during field hours?**
In general, your time in field and the resources provided to you in your field placement are to be used for field related matters. Before using social media communication tools on behalf of your agency, be sure to seek approval of any messages or posts. Be careful not to endorse or promote a product, cause or position without prior approval. If you have personal sites, it is best to maintain them on your own
I can’t find anything in the Code of Ethics that specifically mentions social media, so does that mean the Code of Ethics does not apply?

Absolutely Not! The NASW Code of Ethics provides a variety of standards that social workers should consider when engaging in the use of social media.

While the Code of Ethics may not explicitly mention social media, the recently released Technology Standards address many issues not discussed in the Code of Ethics or these brief guidelines. The Technology Standards contain fifty-five specific standards, along with an interpretation of each standard.

It is the expectation of the Kennesaw State’s Department of Social Work and Human Services MSW Program that all students become familiar with and adhere to the NASW’s Code of Ethics when using social media and NASW and ASWB Standards for Technology and Social Work Practice for the use of technology before placement at their internship. Please review the following:

Take some time to review these guidelines with your agency field supervisor and seek to identify other ethical standards that are applicable in your practice setting. As a social work student, you are continually developing a professional identity and you must be cognizant that your private world has a greater likelihood of becoming public when using social media and other forms of technology. Field supervisors, colleagues, and even clients may have access to information via the Internet that you would otherwise limit to your friends and families so we encourage you to consider the personal versus professional role of social media in your life and your field setting.

Field Internship Activities

This section describes the essential activities involved in the field internship experience, the development of the Learning Agreement document, field placement evaluation, and the Field Work and Professional Performance Committee (FWPPC) process. The Field Education Program’s approach to the practicum experience is grounded in theories of adult and applied learning. The process of field instruction emphasizes experiential learning that begins with the student’s knowledge and experience, builds on that base by adding new information (theory), and proceeds to the immediate application of that learning. Instrumental to this cycle of learning is evaluative feedback and self-evaluation. A supportive teacher-learner partnership is critical to these processes. Effective learning also requires students and field supervisors to actively question theory and practice through critical analysis.

Orientation to Field Education

Graduate students are required to attend a field education orientation meeting the first week of classes and before reporting to their assigned agencies for both generalist and Specialization internships. MSW Field Orientation is mandatory for all MSW students entering field. Separate field orientations are held for generalist and specialization MSW students. Students must contact the Field Education Director in
advance if they are unable to attend mandatory field orientation due to a documented excused absence. In the event of an excused absence, students will be assigned to make-up field orientation session. Students who miss both the mandatory field orientation and make-up orientation will be deferred for field until the orientation is completed. Students may not begin their field placement until they have attended orientation. Any hours completed by a student prior to attending field orientation will not be counted.

**Field Seminar/Integrative Internship Course Grade**
A grade for the field seminar course is assigned by the student’s field faculty instructor and based on review of the agency supervisor’s written evaluation, timesheets, and other class assignments required for the course. Field seminar course grades are based on letter grades of A, B, C, D, or F, and is assigned at the end of each semester in which the student has registered for field seminar course. A student must receive a grade of “B” or above to successfully pass the course. Students that receive a “C” in a field seminar course does not pass the course and must repeat the course to matriculate through the MSW Program. Students receiving a grade of “D” or below in any field seminar course will result in automatic termination from the MSW Program.

The following grading system is used for Field Internship Performance:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
</tr>
<tr>
<td>C</td>
<td>Poor</td>
</tr>
<tr>
<td>F</td>
<td>Failing</td>
</tr>
</tbody>
</table>

If a student receives a grade of “C” in Field Seminar for any semester during the MSW Program, Field Seminar for that semester must be retaken. The student must receive a grade of “B” or above in the retake of Field Seminar. Only one retake is possible. If a student receives a second grade of “C” in Field Seminar, a retake is not possible and the student is automatically terminated from the program. If a student receives a grade of “D” or below in Field Seminar for any semester during the MSW program, the student is automatically terminated from the program.

**The Learning Contract**
The Learning Contract is a collaborative document produced by the student and the field agency supervisor. Due dates for the learning agreement are established by the Field Education Director. The student has primary responsibility for writing and designing the learning activities, which are a product of self-assessment, careful planning, and extensive discussion with the agency field supervisor and the student’s field faculty instructor. This process requires students to take an active part in articulating assignments and tasks they plan to complete in field to aid them in accomplishing the internship outcomes. The Learning Contract provides a focus for student learning throughout the year, establishes and clarifies mutual expectations, and describes the means for evaluation of student competency.

The student Learning Contract marks an important step in building the collaborative relationship between the student, the agency field supervisor, and the assigned field faculty instructor. Developing the Learning Contract provides students with an opportunity to structure their field experience in the way that will be most beneficial to their own educational needs and interests. Throughout the field placement, the student and the field supervisor should review the student’s current Learning Contract to assess the relevance of identified activities. Over the course of a field placement, new opportunities
will arise, different interests will develop, and students will have a more realistic idea of what can be accomplished during the hours they are in the field, leading many students to desire changes to their Learning Contract. Modifications to the Learning Contract must be approved by the agency field supervisor and submitted to the field faculty instructor for final approval.

**Competency Evaluation in Field Education**

Evaluation is a continuous process that encourages active student participation and input. It is based on education related criteria that are openly shared with the student. It takes situational factors into consideration, is tentative and is concerned both with student strengths as well as areas for potential growth. It is enacted in the content of a positive relationship.

Evaluation is an integral part of social work education and social work practice. The continual assessment and evaluation of one’s own practice and awareness of one’s use of self are basic to social work. Evaluation is a beginning place for a process that will continue throughout one’s professional social work career. Comprehensive evaluation includes the following considerations:

- Recognition of evaluation as a continuous process encouraging active (student) participation and input;
- Students are expected to be familiar with the content of the written evaluation and have the opportunity to read and sign it;
- Signature means the student has read the evaluation but not necessarily agrees with the content;
- When a student disagrees with any part of the evaluation, the student is expected to address concerns with the agency supervisor to resolve the matter;
- If disagreement is still unresolved, the student is to put in writing his/her concerns which become part of the evaluation report turned in to the field faculty instructor;
- All internship evaluations become part of the student’s permanent record and become property of the student’s Field Education files;
- Records are only open to students and faculty or staff in the MSW program;
- Evaluation may not be used for reference letters or any other purpose; and
- Material cannot be taken from the file without written consent from the student.

Evaluation of the student's performance and assessment of the agency as a placement setting are ongoing activities during the placement year. Evaluation is an inherent and ongoing process that enables students and their Field Supervisors to maintain their focus and commitment to the learning objectives of the social work field internship. Opportunities for such evaluation occur on a regular basis in both formal meetings at the agency and University, as well as during informal contacts between Field Faculty Instructors, Field Supervisors, and students. A clear understanding of the evaluation criteria should be agreed upon in the first semester of the placement. If there are problems with the student’s performance during placement, the Agency Field Supervisor should pursue resolution of the problems with the student. If resolution is not successful, the Field Supervisor should immediately notify the Field Faculty Instructor.

**Agency Field Supervisor’s Evaluation of Student**

Each Agency Supervisor should review with the student the learning goals and objectives specified in the student's learning contract and the field evaluation forms. Sources of information used to assess the student's performance during a placement term include observations by the Agency Supervisor, input from others, and review of written materials. The Agency Supervisor is responsible for providing close supervision of the student's work and evaluating assignments. Students are responsible for continually
assessing their own learning needs and progress.

The Agency Supervisor in collaboration with the task supervisor (if applicable) completes a mid-
semester (fall only), and end of semester evaluations. All completed evaluations must be reviewed with
student. Grades are assigned for field seminar by the Field Faculty Instructor based on the semester
evaluation, completion of field hours and completion of the field seminar course assignments.

**Students will not receive a grade for field seminar course (SW 7708, SW 7709, SW 8712, or SW 8713)**
without a signed evaluation and all other required documents.

Evaluation of the student’s performance in the field is a collaborative process between the agency
supervisor and the faculty field mentor. The agency supervisor is responsible for providing to the field
mentor two evaluations each semester: at mid-term and at the end of the semester. The student has the
right to read and countersign the evaluation and may add an addendum should they wish to do so. The
final grade for a given semester is assigned by the faculty field mentor based on a review of the mid-
year and final evaluations by the agency supervisor, observations and visits to the agency by the
faculty field mentor for discussions with the student and supervisor, participation in faculty field
mentor/Mentee group meetings and timeliness of field reports to the faculty field mentor. Each faculty
field mentor provides a copy of each student’s grade to the Director of Field Education

**Field Internship Concerns, Reassignment of Placement, and Termination**

*Field Internship Concerns*

If a student, field supervisor, or task supervisor has a concern about any aspect of field education, the
issue should be first reported to the assigned field faculty member. Then, if not resolved, a report
should be made to the Director of Field Education.

If the concern occurs after the placement has begun, in most circumstances, the assigned field faculty
instructor will schedule a joint meeting with the student and the field/task supervisor. The purpose of
the conference is to explore in-depth the concerns of all involved parties and the agency and to
determine an action plan.

During the joint meeting, an action plan will be developed that includes:

- □ A clear identification of problems in learning/teaching;
- □ Specification of the expected behavior changes;
- □ Necessary actions and procedures to be taken; and
- □ A time to review the progress made on the action plan.

When the issue involves field/task supervisor concerns about student performance, field/task
supervisors are expected to provide the student with behaviorally specific feedback prior to placement
termination (unless there is an egregious incident or behavior). Likewise, students who have concerns
about their field placement are expected to directly discuss those concerns with their field supervisor
either prior to or during the joint conference.

*Reassignment of Placement and Termination*

It is expected that most placement concerns can be resolved through a joint meeting process. Due to the
Program’s multiple obligations including the interests and needs of the student, the field agency, the
field/task supervisor and the agency’s clients, serious consideration must always be given to the
decision to change a field placement. However, if there is a decision to remove the student from the
assigned placement, the following policies will apply.
Field/Task Supervisor concerns about the student:
If the field/task supervisor determines that termination of the student from the field placement is the only option, then the placement will end and an alternative plan will be developed for the student. As field/task supervisors voluntarily supervise students, they have the right to terminate an internship if they can no longer work with the student.

Student concerns about the placement:
Decisions regarding placement reassignment based on student concerns or challenges at the agency are made by the assigned field faculty instructor with the approval of the Director of Field Education. Any student who prematurely terminates a field placement without the prior approval of the Director of Field Education risks permanent denial of reassignment into a field placement setting.

Student field placement reassignments are taken into consideration when an agency is unable to meet the student’s learning needs. Reassignments are not allowed due to a student’s personal circumstances.

Regardless of the reason for the termination from the field placement, the field/task supervisor, in consultation with the field faculty instructor, should determine the best way for the student to end the field placement in a professional manner.

When a student leaves the field placement mid semester, the field/task supervisor should complete the mid-semester evaluation. If a student leaves the placement after mid-semester, the field/task supervisor should evaluate the fieldwork performance using the end of semester Supervisor Evaluation of Student form appropriate to the student’s program level.

Steps Following Termination of Placement
In consultation with the Director of Field Education and depending on the circumstances, alternate plans for the student can include one or more of the following:

- Reassign the student to a new field placement;
- Reassign the student to a new field placement with conditions;
- Referral the student to the Field Work and Professional Performance Committee;
- Assign a grade of F for the associated field education course.

Students who are approved for reassignment of their field placement must also be accepted at the new agency. During the interview, the student must be prepared to discuss the reason for their reassignment with the prospective field/task supervisor. Once the student has been accepted into the new agency, the prospective field/task supervisor may need to know information regarding the student’s previous placement experience. It’s the student’s responsibility to share information regarding the status of the student’s social work competencies and practice behaviors and conditions of the field placement (if applicable).

The student who is reassigned will be required to make up any missed field hours in order to fully meet the required number of field hours. Additionally, the student will be required to participate in additional orientation hours at the new placement, which will not be counted toward the required number of field hours. The length and scheduling of this time is to be negotiated with the Field Education program and the agency to which the student is reassigned. All generalist field hours must be completed prior to matriculating to the specialization year.

When the reassignment of the student has been made due to poor performance, only one reassignment will be made.
**Assign a grade of “F” for the Field Education course:**

A student will be assigned a grade of F for the Field Education course when there are especially egregious circumstances (see above) that would seriously jeopardize the integrity of the social work program, the educational standards of the Department of Social Work and Human Services and the University, the field agency and/or the profession, or be considered potentially harmful to the clients with whom the student would be working.

**Tips for General Problem-Solving in Field Placements:**

- Identify problems early. Discuss concerns of any type with the individuals involved and work towards resolving problems before they increase in size or scope.
- Keep supervision notes. Students and Field Supervisors can benefit from having written records of issues or concerns discussed in weekly supervision meetings.
- Communicate clearly. Written and verbal communication should be professional, thoughtful, and strengths-based.
- Keep everyone in the loop. The student, Field Supervisor, and Field Faculty Instructor should all be aware of any concerns and attempts to address concerns at all times.
- Make the evaluation process transparent. While problems should be documented on mid-term and final evaluations, the evaluation should not be the student’s first notification of the problem.
- Use the Director of Field Education for consultation, reflection, and advice. Students, Field Supervisors, and Field Faculty Instructors all have access to the Director of Field Education as a problem-solving resource at all times.

**The Field Work and Professional Performance Committee (FWPPC)**

It is expected that students will meet the required competencies and practice behaviors for the generalist and specialization year course work and field internships; follow the policies and procedures of the respective agency in which they are placed for their internship; and adhere to the standards for professional performance and conduct as addressed in the NASW Code of Ethics. The *NASW Code of Ethics* is included in the Appendix of the MSW Field Manual & MSW Student Handbook.

The Field Work and Professional Performance Committee (FWPPC) serves as both a consultation resource and a professional performance review committee. The committee consist of the MSW Program Director (committee chair), and representatives from the MSW Program faculty and agency setting (for field related issues), MSW Field Education Director (field related issues), MSW faculty (selected by the MSW Program Director), field faculty instructor, student representative (Department of Social Work and Human Services faculty) selected by the student, and the student.

Any party to the fieldwork process or any party questioning a student’s deficiencies in field internship, violation of agency policies and procedures or professional performance as it relates to violation of the NASW Code of Ethics (supervisor, faculty field instructor, faculty member), may request consultation or initiate a request for review by the FWPPC. The MSW program attempts to approach student’s field work and professional performance matters in a preemptive fashion, to the extent possible.

An important issue for students during the field internship is that of confidentiality of case records and recordings. Students are expected to review their work with clients to include tapes, written materials to include supervisory sessions with their supervisors, appropriate agency personnel during case conferences and staff meetings and/or field faculty instructors. The student cannot discuss or share client records or information with parties outside the agency unless given permission to do so by the agency supervisor with appropriate permission from the client. If students use case materials for written or verbal classroom assignments/presentations, to include bio-psychosocial-spiritual assessments, they must inform the agency supervisor and ensure that the materials exclude names or other identifying client information to
Each student must carefully read the NASW Code of Ethics. The Code of Ethics is discussed with students in Field Seminar and in various classes. A student’s failure to meet first and second year competencies and practice behaviors, adhere to agency policies and/or follow standards of professional performance and ethical conduct, as defined by the NASW Code of Ethics, will be considered grounds for a remediation plan. If the remediation plan is not appropriately followed by the student, they may receive a failing grade, and be terminated from the program. The trajectory of outcomes is determined by the FWPPC, in consultation with the KSU’s Department of Student Conduct and Academic Integrity.

Field supervisors are expected to contact Field Faculty Instructors whenever there are deficiencies in field learning, violations of agency policies and/or Professional Performance issues by a student when the issues first surface so that every effort is made to resolve these deficiencies or issues early on. When deficiencies in field learning, violation of agency policies and/or professional performance issues with a student first surface, the following process is followed:

1. Attempts should be made by the field supervisor in collaboration with the Field Faculty Instructor and the student to resolve any deficiencies in field learning, violations of agency policies and/or professional performance issues when they first arise. Similar effort is made by the faculty member and the MSW Program Director to address professional performance issues in the classroom.

2. Early intervention and development of a written remediation plan (Corrective Action Plan) by the Field Faculty Instructor, agency supervisor and student (or the faculty member and the student in professional performance matters) are given high priority and importance (i.e., field/professional performance remediation plan). The plan will delineate the agency violations, and professional performance issues requiring address and the time line within which the issues must be addressed. For example, a field issue with regard to reporting to work each day at the time expected by the agency and/or dressing in a professional manner must show improvement immediately and the time-line will indicate that the student is expected to report to the agency on time each day and to dress in appropriate attire beginning immediately. A time-line for violation of agency policies or professional performance issues, including violations of the NASW Code of Ethics, will be determined by the agency supervisor, Field Faculty Instructor and/or faculty member. The Field Faculty Instructor and the student must sign The Field Performance Remediation Contract and a signed copy will be provided to the student, Field Supervisor, Faculty Field Faculty Instructor, Director of Field Education and the Director of the MSW Program. (Field Performance Remediation Contract is located in the Appendix of the Field Education Manual.) All parties involved will sign the Professional Performance Remediation Contract and provide a copy to the MSW Program Director.

3. If the deficiencies are not resolved/or plan not implemented in a timely fashion, the MSW Program Director should be notified for professional performance and the MSW Field Education Director should be notified for field performance.

4. If deficiencies in field learning, violation of agency policies and/or professional performance issues in the Field Performance Remediation Contract/ Professional Performance Remediation Plan are met within the identified time line, the student continues his/her internship at the agency and remains a student in the MSW Program.

5. If deficiencies in field learning, violation of agency policies and/or professional performance issues in the Field Performance Remediation Contract are not met within the identified time line, the procedures below will be followed:

   a. The Director of the MSW Program will call a meeting of FWPPC. The meeting will include:
The MSW Program Director serving as Chair, the person filing the charge(s) (Faculty member, Faculty Field Faculty Instructor, the Field Supervisor), the Director of Field Education if the matter pertains to the field, or a faculty member selected by the Director of the MSW Program if the issue is filed by a faculty member, and one representative of the student’s choosing.

b. The Field Supervisor or faculty member and the student must each provide a written statement to the Director of the MSW Program, detailing their perspective of the deficiencies, violations of agency policies, and/or professional performance issues. The Director of the MSW Program, who serves as Chair of the FWPPC must receive this written statement from each party no later than three (3) business days in advance of the scheduled meeting.

c. The Director of the MSW Program will share the written statements, provided by the Field Supervisor or faculty member and the student, with members of the FWPPC. The Field Supervisor or faculty member will receive a copy of the student’s written statement and the student will receive a copy of the Field Supervisor’s or faculty member’s written statement in advance of the meeting.

d. At the meeting, the Field Supervisor or faculty member will verbally present his/her concerns regarding the deficiencies in field learning, violations of agency policies and/or professional performance issues to members of the committee.

e. The student will verbally present his/her concerns regarding the deficiencies in field learning, violations of agency policies, and/or professional performance issues to members of the committee.

f. Following the verbal presentations by the Field Supervisor or faculty member and the student, they will each be asked to leave the meeting.

g. The FWPPC will discuss the issues presented and make a decision regarding steps the student must take to continue in the program or a decision to terminate the student.

h. The Director of the MSW Program will verbally inform the student of the committee’s decision immediately following the committee’s decision.

i. The verbal decision will be provided to the student in writing within three (3) business days.

j. The student may appeal the decision of the FWPPC by following the grievance/appeal process listed in the KSU Graduate Catalog. The Department Chair is the first level of this appeal process. The KSU grievance process is designed to ensure that students receive due process.

Referral to the Field Work and Professional Performance Committee (FWPPC)

A student is referred to the FWPPC when there are issues and concerns in their field placement that could jeopardize their continued enrollment in the MSW program and for whom additional consultation is warranted. Once the student is referred to the FWPPC, the student may be temporarily removed and/or denied reassignment into a field placement setting. Examples of these circumstances include (but are not limited to): uncertainty about the student’s fit for the social work profession, a pattern of inappropriate/disruptive behavior, criminal behavior, violations of the Student Conduct Code, the Student Academic Misconduct Code, the KSU’s MSW Standards of Professional and Ethical Behavior in Field Education, and/or a violation of the NASW Code of Ethics. Examples of possible recommendations of the FWPPC that are not intended to be an exhaustive list include: reassignment into a field placement setting, reassignment with formal conditions, temporary denial of reassignment into a field setting, or assigning a grade of F rendering the student academically ineligible to continue in the MSW program. Additional information about the FWPPC is located in this manual.
Field Performance Remediation Contract

All students are expected to be guided in their behaviors and actions by the professional ethics guidelines as defined in the \textit{NASW Code of Ethics} and the \textit{KSU MSW Program Standards of Professional and Ethical Behavior in Field Education}. Although this list is not exhaustive, deficiencies in any of the following areas, can result in the development of a Field Performance Remediation Contract (Please see below) by the field faculty instructor in collaboration with the agency supervisor.

- Student’s ability to engage clients;
- Student’s ability to use supervision for one’s professional development;
- Student’s ability to consistently follow the supervisor’s guidance;
- Student’s ability to follow agency procedures and policies;
- Student’s ability to report to the agency at the time designated by the supervisor during agency hours;
- Student’s ability to complete agency assignments in a timely manner;
- Student’s ability to work with other professionals;
- Student’s ability to establish appropriate boundaries with clients;
- Student’s ability to engage in professional behaviors and activities with clients; and
- Other matters that may impact the student’s professional performance in the field placement.

Once a Field Performance Remediation Contract is developed and time lines established the student must meet these expectations and timelines. Failure to meet the terms of the Field Performance Remediation Contract can result in a grade of “F” for Field Work. A grade of “F” in Field Work will mean automatic dismissal from the MSW Program.

Student Leave of Absence (Academic and Field Education)

A leave of absence may be requested in writing by a student who is in good standing, in both his/her academic and field work. Students may petition for a leave not to exceed a total period of three semesters, with the understanding that the MSW program will evaluate the situation on an individual basis. A student extending leave beyond the approved period will be considered to have withdrawn from the MSW program, and reinstatement will be subject to the procedures governing withdrawal. Students who withdraw from the program must reapply for consideration to join the program in the future.

A written request for leave, detailing the reason, must be sent to the Director of the MSW program. The Director will refer the request to a faculty Review Committee that includes the MSW Director, Director of field education, student’s faculty field mentor/academic advisor, and one additional faculty member appointed by the MSW program Director. Students taking a leave for medical reasons are required to submit a letter from their physician prior to the leave and to provide a release statement upon return that indicated the student can meet the demands of the program. Students who have been approved for a leave of absence must let the MSW Program Director know in writing that they are planning to return to the program for the next academic year. This must be completed and submitted during the general admissions timeline. A copy of the letter must also be submitted to the Graduate College. Please see the Graduate College policies for more information.

Readmission Policy

Students, who withdraw from the program prior to completing the degree requirements, may submit a letter to the Director of the MSW Program indicating an interest in reapplying to the program. The letter must be written within a five-year period from the date of withdrawal from the program. The Director of the MSW Program will consult with appropriate faculty and subsequently notify graduate admissions if the student is to be readmitted. The Director of the MSW Program has the final decision.
Forms

Form A: NASW Code of Ethics

Form B: Criminal Background Policy

Form C: Standards of Professional and Ethical Behavior in Field Education

Form D: CSWE Statement on Department of Labor Regulations for Internships

Form E: MSW Field Education Application (Generalist)

Form F: MSW Field Education Application (Specialization)

Form G: Learning Contract Form (Generalist)

Form H: Learning Contract Form (Specialization)

Form I: Acknowledgements & Signatures

Form J: Time Sheet Form

Form K: Field Placement Agreement (Generalist)

Form L: Field Placement Agreement (Specialization)

Form M: Student Self-Evaluation (Generalist)

Form N: Student Self-Evaluation (Specialization)

Form O: Field Supervisor Evaluation of Student Mid-Term (Fall only)

Form P: Field Supervisor End of Semester Evaluation of Student (Generalist)

Form Q: Field Supervisor End of Semester Evaluation of Student (Specialization)

Form R: Student Evaluation of Field Placement and Field Supervisor (Spring Only)

Form S: MSW Field Education Incident Report – Student Form

Form T: Field Performance Remediation Contract
MSW Field Performance Remediation Contract

The deficiencies outlined below must be satisfactorily met by (date) _______________ in order for the student whose signature appears below to pass Field Seminar ______________.

Deficiencies ____________________________________________________________

Tasks to be met by Student ______________________________________________

I, __________________________, a student in the MSW Program at KSU, understand that I must satisfactorily master the deficiencies outlined above by the designated date in order to pass Field Work____________.

Student: _______________________________________________ Date: _____________

Faculty Field Instructor: __________________________________ Date: _____________

My signature indicates that I have read and comprehended the contents of this contract. My signature does not indicate that I am in agreement with the faculty field mentor’s evaluation of me. I further understand that if I do not sign this form, I will not be permitted to continue in Field Practicum. If I interrupt Field Practicum, I will not be able to meet the Field Practicum Expectations for Field Practicum which will result in my being awarded the grade of “F”. A grade of “F” in Field Practicum means that I am automatically dismissed from the program.

If I satisfactorily master the deficiencies in Field Seminar as established in this contract, and make a grade of “C”, I must retake the Field Seminar and make a grade of “B” or better. I understand that I can only make one grade of “C” in Field Seminar to be allowed to retake Field Seminar. A second grade of “C” in Field Seminar will result in termination from the MSW Program.

The student, __________________________________________, has satisfactorily met the deficiencies set forth in the Field Performance Remediation Contract. The final Field Practicum grade for this semester is given at the end of the semester.

The student, __________________________________________, has not satisfactorily met the deficiencies set forth in the Field Performance Remediation Contract and will receive a grade of “F” and be terminated from the MSW program.
Frequently Asked Questions

The following information provides a summary of the KSU MSW Program’s Field Education Program. More extensive information can be found in the MSW Student Handbook and the Field Education Program Manual.

1. **What is the purpose of field education?**

   Field education is an integral part of both the Generalist and Specialization Curricula. Classroom learning focuses on discrete knowledge and theoretical background whereas the field curriculum exposes students to a wide range of real-world problems and possibilities. Field education teaches students to assess these situations and to develop, implement, and evaluate social interventions for various client systems, including individuals, families, groups, organizations, and communities.

2. **What types of agencies are selected as field sites?**

   There are a wide range of cooperating agencies in over 10 Georgia counties. Each year, more than 75 students are placed in a variety of agencies and programs. All students complete their practicum in Georgia. Placement sites represent the broad scope of social work practice in public and private, not-for-profit, and for-profit agencies. Typical practicum sites include county-level departments of social services, community providers of mental health services, substance abuse agencies, medical facilities such as hospitals and hospices, domestic violence agencies, homeless shelters, and public schools. Students are also placed in agencies involved in program and policy development, advocacy, and regional and statewide planning such as private nonprofit agencies, family resource centers, and others.

3. **What kind of training is available to a practitioner who wishes to serve as a field instructor?**

   First-time field supervisors are asked to participate in the New Field Supervisor Orientation. Each field supervisor is assigned a field education faculty instructor who is available to interpret the program’s goals and objectives for field education and who advocates for both the student and the field supervisor. The New Field Instructor Orientation is offered every August of the academic year. Field supervisors are also invited to participate in continuing education opportunities offered by the Department of Social Work and Human Services.

4. **Does the school pay field instructors to work with students?**

   No. Most field supervisors tell us the greatest reward comes from helping others develop professional knowledge and skill. Although we can never fully compensate field supervisors for their teaching and expertise, they are offered reduced or no cost trainings offered by the Department of Social Work and Human Services, many of which offer CEU credits available.

5. **What are the goals of the first (Generalist) internship?**

   The Generalist Internship is designed to help the student acquire and improve basic social work practice skills in work with individuals, families, and small groups (direct practice) as well as with work units, organizations, and communities (community, management, and policy practice). Therefore, students are expected to carry a caseload where they can practice assessment, engagement, and intervention skills. Generalist placement students are also expected to participate in tasks that can improve a work unit, an organization, or some aspect of the community. In both kinds of activities, students should be able to demonstrate a beginning ability to evaluate their social work practice.

6. **What are the goals of the second (Specialization) internship?**

   In their second year, students select a placement in their area of interest. Students are expected to develop a depth of social work practice knowledge and skills sufficient for competent, self-evaluative, accountable, and ultimately, autonomous practice.
7. What will the prospective field instructor know about the student before the pre-placement interview?

After a placement is recommended by the director of field education, the student must schedule a pre-placement interview with the field supervisor and other relevant agency or program staff. The prospective field supervisor is only provided the student’s name before the interview. In some cases, prospective field supervisors call the Field Education Program to clarify information.

8. What is the purpose of the pre-placement interview?

The pre-placement interview gives the student and field supervisor an opportunity to get acquainted and explore each other’s expectations about the placement. The goal of this interview is to determine if the match of student/agency/field supervisor is appropriate. The interview helps the student and field supervisor clarify and adjust their expectations and prepare for the internship experience. If the match of student and agency does not seem appropriate, the field supervisor will immediately notify the Field Education Office so that an alternate placement option can be explored.

The placement assignment process is not complete until the potential field supervisor and the student have met and the Field Education Office has received confirmation of placement acceptance from the field supervisor.

9. Can a student do a field placement in their current place of employment?

Employer-based field placements are one option that can be developed for students to fulfill their field education requirements while retaining a connection to their employing agency. Employer-based field placements can provide students with the opportunity to continue employment with their agency while completing their Generalist and/or Specialization Internship. Field placement assignments must be educationally appropriate to social work and engage students in new learning related to social work practice. An employer-based placement is possible only if the employing agency agrees to the placement and is willing and able to make accommodations to meet the student’s learning needs. Students requesting approval for placement in their employing agency must submit an Employer-Based Placement Proposal.

10. Who needs to be involved in setting up an employer-based placement?

Setting up placements in employing agencies requires more effort than placement in non-employing agencies. This extra attention is necessary to ensure that the planned placement experience meets all program requirements, required competencies and behaviors, and does not duplicate learning that the student/employee has already mastered as part of their current or past job duties. Arrangement and approval of the placement plan requires involvement of the following individuals: Student/employee, job supervisor, an agency executive or administrator, potential field supervisor, task supervisor (if applicable), and a field education faculty instructor. In most instances, the director of field education will visit the agency and meet with those listed above to determine if the proposed plan meets field placement requirements and to answer any questions. The Director of Field Education makes the final decision regarding approval of requests for employer-based placements on a case-by-case basis.

11. What are the benefits of an employer-based field placement?

Because the student/employee already knows and is oriented to the agency, he or she might initially have a less steep learning curve relative to others placed in a new agency. The student/employee also brings new learning back to the agency, which can enhance agency practice. The agency demonstrates its commitment to the student/employee’s professional development and education. The agency also retains a quality employee and protects its investment in the employee.
12. What are the challenges of an employer-based field placement:

Clearly separating student and employee roles can be difficult for both the student and other staff within the agency. It also can be challenging to ensure appropriate division of work load to accommodate student learning activities. As a result, the student role may be neglected or forgotten at times. The student/employee’s work colleagues also may feel confused or even resentful of the employee in a student role. In addition, employer-based placements can sometimes create sensitive situations in the workplace because students/employees might have greater access to agency leadership, meetings, and information than they had in their previous role in the agency.

Additionally, when a student is terminated as an employee they will also be terminated as an intern. The student’s internship placement is automatically suspended and the student is referred to the FWPPC for review and a final recommendation for field internship placement. Please see the FWPPC process in the manual.

13. Do students need to have a car?

Students are responsible for securing transportation to their field placements regardless of location. It is to the student’s advantage to have a personal vehicle. Many of our local communities are small and have few resources for field placements.

14. Do students need insurance?

The Department of Social Work and Human Services carries a blanket professional liability insurance policy for students. Coverage is limited to $2 million per incident, and $4 million aggregate.

15. What if the placement doesn’t work?

Occasionally it is necessary to terminate placements based on factors related to the agency, field instructor, or student intern. Termination requires as much planning as placement. The reasons for terminating the placement should be thoroughly discussed by the student and their field instructor, and in consultation with the field education faculty. Students are not relieved of their field responsibilities until the termination of the placement is approved by the Director of Field Education. See the Field Education Program Manual for specific procedures and guidelines.

16. Do I inform all clients that I have contact with that I am a student Intern?

Yes, it is part of their rights under informed consent.

17. Should I continue to work at my field placement during school breaks or holidays?

Many agencies do not require students to work during school breaks holidays. However, there are some agencies that do require students to continue their internship obligations during school breaks and holidays. It is the student’s responsibility to obtain this information during the interview process before the start of the internship. If the student and the field supervisor are unable to make arrangements the student must immediately notify their field faculty instructor for resolution.

18. Does it matter how many hours you work each day as long as you make 16 hours a week?

No, it is okay to have a variation of hours. This may be the case depending on the need of the internship site.

19. How do we make up hours if we miss days?

This should be negotiated with the agency supervisor, and you are responsible to complete all the hours of internship in semester in which the hours were missed.
20. If I have issues with my agency supervisor or another employee at my internship site, what are the steps I should take to resolve this issue?

   Notify your field faculty instructor to discuss a plan of action.

21. If I am having an issue that is not being resolved through my field faculty instructor, who should I talk to next?

   If you have met with your field faculty instructor and was unable to resolve the field internship issue you will contact the Director of Field Education for assistance.

22. What if I witness something I am uncomfortable with at my internship site?

   Please immediately notify your agency supervisor and then your field faculty instructor.

23. Can I socialize with my supervisor and co-workers outside of the office?

   Professional boundaries should be considered when assessing if it is appropriate to socialize outside of the work setting.

24. What if my internship asks me to use my own vehicle for agency business?

   You can NEVER transport clients using your own vehicle. If you use the vehicle for agency business (trainings, errands, etc.) you can ask to be reimbursed for the mileage.

25. Do I get a gas stipend if my internship site is far away?

   No, the MSW program does not reimburse students for any travel expenses related to the field internship placement.

26. Can I also shadow other professionals at the agency, such as, nurses, LPC’s, case managers, etc.?

   Yes, you may shadow other professionals to gain a better understanding of the agency and other professions. The majority of your internship hours, however, should be spent with a graduate level social worker with at least 2 years of post MSW experience for generalist students and an LCSW for Specialization students.
