Research in Progress

"Blended Learning and On-Line Learning"

While this is not actually research, and I have no research expectations, I will include involvement in on-line and hybrid learning in this section. I completed the on-line training course and the Blended Learning course through CETL (2013) at KSU, I am continuing the development of ES2200 and ES3100 as Blended Learning/Hybrid courses and I continue to collaborate with EHS faculty, and have been digesting literature and seeking workshops available on the subject. I accepted the opportunity to teach ES 2300, on-line, in the spring of 2018 and hope to continue teaching the course.
